

Assistant Secretary of Defense (Health Affairs).

(3) In addition to preventive care services provided pursuant to paragraph (b)(2) of this section, other benefit enhancements may be added and other benefit restrictions may be waived or relaxed in connection with health care services provided to include the Uniform HMO Benefit. Any such other enhancements or changes must be approved by the Assistant Secretary of Defense (Health Affairs) based on uniform standards."

Also, under TRICARE Standard, education and counseling services are expressly excluded under 32 CFR 199.4(g)(39).

D. National Defense Authorization Act (NDAA) 2007 Disease Management Directives

The NDAA 2007 section 734 requires the design and development of a fully integrated program on disease and chronic care management for the military health care system that provides uniform policies and practices on disease and chronic care management throughout the TRICARE network by October 1, 2007. The NDAA 2007 further states the program "shall include strategies for disease and chronic care management for all beneficiaries, including beneficiaries eligible for benefits under the Medicare program under title XVIII of the Social Security Act (42 U.S.C. 1395 *et seq.*), for whom the TRICARE program is not the primary payer for health care benefits."

The purposes of the MHS DM programs, as stated in the NDAA 2007, are to facilitate the improvement of the health status of individuals under care in the military health care system, to ensure the availability of effective health care services for individuals with diseases and other chronic conditions, and to ensure the proper allocation of health care resources for individuals who need care for disease or other chronic conditions. The NDAA 2007 mandates the DM program to address, at a minimum, the following chronic diseases and conditions: Diabetes, cancer, heart disease, asthma, chronic obstructive pulmonary disorder, and depression and anxiety disorders.

E. Description of Demonstration Project

Under this demonstration, DoD will waive, for disease management services provided to TRICARE Standard beneficiaries, the provisions of 10 U.S.C. 1079(a)(13) and 32 CFR 199.4(g)(39) that expressly exclude clinical preventive services for TRICARE Standard beneficiaries in the current benefit. The MHS will enroll TRICARE Standard

beneficiaries in its DM programs. DM services provided to Standard beneficiaries will include, but are not limited to: Clinical preventive examinations, patient education and counseling services, and periodic screening exams.

There will be a cap on MHS DM program costs not to exceed the amount approved by the contracting officer. The DM program costs are total costs of DM services provided to both Prime and Standard beneficiaries. Only those beneficiaries identified by TRICARE Management Activity (TMA) for disease management of asthma, congestive heart failure, and diabetes are included in the current program, with other diseases or conditions to be added in the future as funding permits. The beneficiaries identified by TMA are included in the DM program unless the beneficiary chooses to opt out.

This action will directly reduce variation across the system and result in improved consistency and quality for beneficiaries with targeted chronic illness, regardless of TRICARE classification. Furthermore, including TRICARE Standard beneficiaries in current DM efforts will inform the MHS about total potential savings and return on investment (ROI) associated with DM, a stated requirement for inclusion in the Congressional report per the NDAA 2007. The system-wide DM program will improve the quality of care by educating patients about their disease and helping them manage their symptoms, thereby avoiding many complications and possibly slowing the progression of their chronic disease, thus resulting in significant cost savings.

F. Implementation

The demonstration is effective on April 1, 2007.

G. Evaluation

An independent evaluation of the demonstration will be conducted. The evaluation will be designed to use a combination of administrative and survey measures of health care outcomes (clinical, utilization, financial, and humanistic measures) to provide analyses and comment on the effectiveness of the demonstration in meeting its goal of providing uniform disease management policies and practices across the MHS.
