**Title:** Questionnaire for the Chlorine and Chlorinated Hydrocarbon Manufacturing Segments.

**ICR numbers:** EPA ICR No. 2214.01.

**ICR Status:** This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** The U.S. Environmental Protection Agency is conducting a census of facilities that manufacture chlorine and/or certain chlorinated hydrocarbons (CCH) as part of its effort to review the effluent limitations guidelines and standards for these operations. EPA is considering revision of the Organic Chemicals, Plastics and Synthetic Fibers Point Source Category regulations at 40 CFR Part 414 for facilities that manufacture ethylene dichloride, vinyl chloride monomer, polyvinyl chloride and other chlorinated hydrocarbons. EPA is also considering revision of the Inorganic Chemicals Point Source Category regulations at 40 CFR Part 415 for facilities that manufacture chlorine as well as chlorine manufacturers not regulated under 40 CFR Part 415. The questionnaire seeks information on (1) Technical data, including general facility information, manufacturing process information, wastewater treatment and characterization information, and information on sampling data; and (2) financial and economic data, including ownership information, facility/company information, and corporate parent financial information. The technical data will be used to determine the industry production rates, water use for processes, rates of wastewater generation, pollution prevention, and the practices of wastewater management, treatment, and disposal. The financial and economic data will be

used to characterize the economic status of the industry and to estimate the possible economic impacts of wastewater regulations. This questionnaire will be sent to all identified facilities engaged in CCH production. Completion of this one-time questionnaire will be mandatory pursuant to Section 308 of the Clean Water Act.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 435 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Facilities that manufacture chlorine and/or certain chlorinated hydrocarbons, including polyvinyl chloride.

**Estimated Number of Respondents:** 65.

**Frequency of Response:** One-time only.

**Estimated Total Annual Hour Burden:** 28,300.

**Estimated Total Annual Cost:** \$1,082,000 includes \$0 annualized capital expenditure and \$3,810 Respondent O&M costs.

Dated: January 12, 2007.
