

Dakota. As part of these operations, Eagle is the operator of approximately 13 wells utilized for the disposal of salt water produced in association with oil and gas production in the State of North Dakota. Eagle is also the owner of oil and gas leasehold interests located in the Province of Saskatchewan, Canada, including the Florence Well. The Florence Well was completed as a producer of oil and gas on or about August 10, 2006. The Florence Well is operated by Colonia Energy Corp. ("Colonia"). Colonia owns 45 percent of the well and Eagle owns 55 percent of the well. Eagle has asserted in its application that if this application for Presidential permit is approved and the expansion of its existing pipeline is ultimately built, it is likely that Colonia will participate in the line and ownership in the pipeline will be identical to that of the Florence Well (45 percent Colonia and 55 percent Eagle).

According to the description in Eagle's application, the proposed new border crossing would consist of approximately five-hundred (500) feet of 3-inch diameter pipeline on the U.S. side of the international boundary, which would be buried below ground level. The proposed new section of pipe will run from the international boundary to connect to the existing 2-inch diameter pipe connected to the Schmidt Estate #1-36 Well. The new pipeline would become part of the Lakeview Pipeline System.

As required by E.O. 13337, the Department of State is circulating this application to concerned federal agencies for comment. In accordance with Section 102(C) of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(C)) and implementing regulations promulgated by the Council on Environmental Quality (40 CFR parts 1500-1508) and the Department of State (22 CFR part 161), including in particular 22 CFR 161.7(c)(1), the Department of State intends to prepare an environmental assessment (EA) to determine if there are any potential significant impacts and to address alternatives to the proposed action.

DATES: The Department of State welcomes public comment and invites those who are interested in submitting comments relative to this proposal to provide such comments, in duplicate, on or before September 17, 2007 to Jeff Izzo, International Energy Commodity Policy, Room 4843, Department of State, Washington, DC 20520, or e-mail to izzojr@state.gov. The application and related documents that are part of the record to be considered by the

Department of State in connection with this application are available for inspection in the Office of International Energy and Commodity Policy during normal business hours.
