Title: National Park Service's Evaluation of Pilot Interventions to Increase Healthful Physical Activity in Parks.

Form Number(s): None.

OMB Number: 1024-0253.

Expiration Date: 11/30/2007.

Type of Request: 6 Month Emergency Approval.

Description of Need: President George W. Bush's *HealthierUS* Initiative and Executive Order 13266 calls on Federal agencies to improve the flow and use of information on personal fitness and increase the accessibility of resources for physical activity. In March 2006, the Health and Recreation Committee of the National Park Service (NPS) Advisory Board recommended that the agency undertake seven pilot projects to determine how the NPS could effectively implement the key objectives of the *HealthierUS* Initiative. The reports and its recommendations were accepted by the NPS Director. The pilot interventions will employ quasi-experimental designs to evaluate a variety of methods for increasing healthful physical activity by park visitors and/or residents of communities near parks. The pilots include three "destination" parks (Sitka National Historical Park, Zion National Park, and Acadia National Park) and four "urban" parks (Cuyahoga Valley National Park, Chesapeake and Ohio Canal National Historical Park, Point Reyes National Seashore, and Timucuan Ecological and Historic Preserve). Data collection is set to take place at the different NPS units during the summer and into the early fall of 2007. Pilot projects include using surveys to measure activity levels both before and after healthy activity interventions, as well as focus groups to better understand decision-making and behavior related to physical participation.
