

operations, environmental samples of soil and groundwater were collected.

Of the fifty-seven different analytes for soil, three semi-volatile organic compounds and fourteen metals were present at concentrations that exceeded cleanup objectives. The highest concentrations were primarily limited to surface soil samples.

The ground water sampling results suggested no impact to the ground water near the Abandoned Powder Burning Pit.

A time-critical removal action was conducted between 2002 and 2006 to reduce metal and carcinogenic PAHs contamination in soils. Regulatory review of this action is in progress.

Parcel 2—Seneca County Jail [Comment 8]

This 25.2 acre parcel is located in the southeast quadrant of SEDA, along its eastern perimeter. The parcel encompasses two SMWUs designated SEAD-50 and SEAD-54, of which 22 acres have been remediated under CERCLA. Investigations were completed to identify potential environmental impacts at each SWMU and were supplemented with risk evaluations that ultimately determined no further action was required for these SWMUs. Based on investigations and remedial activities performed with EPA and State approval and oversight, the SWMUs described below are proposed for deletion from the NPL.

SEAD-50 and SEAD-54 Tank Farm Area

Characterized as a former tank farm area, approximately 160 above-ground storage tanks were once located within the triangular shaped land tract known as SEAD-50/54. The preliminary investigation of the area, which was performed in 1993, was reported in the SWMU Classification Report, and as a result it was identified as a SWMU. The area which was subsequently identified as SEAD-50 was used for dry material storage that included stockpiles of strategic ores such as antimony, rutile, and silicon carbide. One storage tank (Tank #88) contained asbestos ore material and was assigned a separate SEAD designation (SEAD-54). All tanks were removed prior to implementing a phased program of investigation, evaluation, and remediation.

In 1994, an RI and supplemental ESI were performed to characterize the full extent of environmental impacts specific to the SEAD-50/54 area and determine potential threats to human health and the environment. The investigations entailed the completion of a geophysical survey, a drilling

program, test pit excavations, and an environmental sampling program designed to collect surface soil, subsurface soil, surface water, sediment, and groundwater media. Analytical results identified elevated concentrations of selected metals (arsenic, lead, manganese, potassium, and zinc) in tank farm soil materials that were determined to represent a potential environmental threat. A time-critical removal action was performed from late 2002 to early 2003 to excavate, remove, and dispose of impacted soil material from SEAD-50/54. The "Final Completion Report" for SEAD-50/54, which documented findings of the removal action and confirmatory sampling results, presented data supporting a determination that SEAD-50/54 no longer poses a threat to human health and the environment.

EPA, with the concurrence of the State, approved a remedy in September 2005 which required "No Further Action" for SEADs-50/54. The remedy required that the PID and Warehouse Areas, including SEADs-50/54, be subject to controls restricting future residential development and groundwater use. Accordingly, the recorded deed for this Parcel contains the land use restrictions on land and groundwater use. [Comment 9] These land use controls are considered CERCLA actions and are included among the documents which are the basis for this action.

Major Community Involvement Activities

The Army published its Community Relations Plan in October 1992 and created a Restoration Advisory Board to facilitate participation of and input from the public throughout the CERCLA cleanup process. Each decision document at the Site has been made available for public comment, discussed at public meetings, and placed in the information repository before the decision document was finalized.

#### List of Subjects in 40 CFR Part 300

Environmental protection, Chemicals, Hazardous substances, Intergovernmental relations, Reporting and recordkeeping requirements, Superfund.

Dated: August 17, 2007.

Alan J. Steinberg,

Regional Administrator, Region 2.

BILLING CODE 6560-50-P

## DEPARTMENT OF HOMELAND SECURITY

### Federal Emergency Management Agency

#### 44 CFR Part 67

[Docket No. FEMA-B-7734 & D-7818]

#### Proposed Flood Elevation Determinations

**AGENCY:** Federal Emergency Management Agency, DHS.

**ACTION:** Proposed rule.

**SUMMARY:** Technical information or comments are requested on the proposed Base (1% annual chance) Flood Elevations (BFEs) and proposed BFEs modifications for the communities listed below. The BFEs are the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

**DATES:** The comment period is ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

**ADDRESSES:** The proposed BFEs for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

**FOR FURTHER INFORMATION CONTACT:** William R. Blanton, Jr., Engineering Management Section, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-3151.

**SUPPLEMENTARY INFORMATION:** The Federal Emergency Management Agency (FEMA) proposes to make determinations of BFEs and modified BFEs for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations are used to meet

the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

*National Environmental Policy Act.* This proposed rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

*Regulatory Flexibility Act.* As flood elevation determinations are not within the scope of the Regulatory Flexibility Act, 5 U.S.C. 601–612, a regulatory flexibility analysis is not required.

*Regulatory Classification.* This proposed rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

*Executive Order 13132, Federalism.* This proposed rule involves no policies that have federalism implications under Executive Order 13132.

*Executive Order 12988, Civil Justice Reform.* This proposed rule meets the applicable standards of Executive Order 12988.

#### List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 67 is proposed to be amended as follows:

#### PART 67—[AMENDED]

1. The authority citation for part 67 continues to read as follows:

**Authority:** 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

#### § 67.4 [Amended]

2. The tables published under the authority of § 67.4 are proposed to be amended as follows:

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground		Communities affected
		Effective	Modified	
Larimer County, Colorado, and Incorporated Areas				
Dry Creek (North of Canal) ...	Just upstream of the confluence with Larimer and Weld Canal.	+4994	+4993	Unincorporated Areas of Larimer County.
(South of Canal) .....	Approximately 900 feet downstream of Shields Street	+5017	+5016	City of Fort Collins, Unincorporated Areas of Larimer County.
	Just upstream of the confluence with the Cache La Poudre River.	+4919	+4916	
East Vine Diversion .....	Approximately 850 feet upstream of Redwood Street	+4965	+4964	City of Fort Collins, Unincorporated Areas of Larimer County.
	Just upstream of the confluence with Dry Creek (South of Canal).	None	+4944	
East Vine Diversion Left Overbank Flow.	Just downstream of Larimer and Weld Canal .....	None	+4983	City of Fort Collins, Unincorporated Areas of Larimer County.
	Just upstream of Vine Drive .....	None	+4944	
Larimer and Weld Canal .....	Approximately 1900 feet upstream of Vine Drive .....	None	+4948	City of Fort Collins, Unincorporated Areas of Larimer County.
	At the confluence with East Vine Diversion .....	None	+4983	
Old Dry Creek (Historic Channel).	At the upstream diversion from Dry Creek (North of Canal).	None	+4993	Unincorporated Areas of Larimer County.
	Just downstream of Mulberry Street .....	+4921	+4919	
	Approximately 800 feet downstream of Dry Creek (South of Canal).	+4931	+4930	

\* National Geodetic Vertical Datum.

# Depth in feet above ground.

+ North American Vertical Datum.

#### ADDRESSES

##### City of Fort Collins

Maps are available for inspection at Stormwater Utilities Department, 700 Wood Street, Fort Collins, CO 80521.

Send comments to Doug Hutchinson, Mayor, City of Fort Collins, 300 LaPorte Avenue, Fort Collins, CO 80522–0580.

##### Unincorporated Areas of Larimer County

Maps are available for inspection at 200 West Oak Street, Fort Collins, CO 80521.

Send comments to Karen Wagner, Chair, Larimer County Board of Commissioners, P.O. Box 1190, Fort Collins, CO 80522.

#### Graham County, North Carolina, and Incorporated Areas

**BILLING CODE 9110-12-P**

**DEPARTMENT OF THE INTERIOR****Fish and Wildlife Service****50 CFR Part 17**

**Endangered and Threatened Wildlife  
and Plants; 90-Day Finding on a  
Petition To List Kenk's Amphipod,  
Virginia Well Amphipod, and the  
Copepod Acanthocyclops  
columbiensis as Endangered**

**AGENCY:** Fish and Wildlife Service,  
Interior.

**ACTION:** Notice of 90-day petition  
finding.

**SUMMARY:** We, the U.S. Fish and Wildlife Service (Service), announce a 90-day finding on a petition to list the Kenk's amphipod (*Stygobromus kenki*), the Virginia well amphipod (*Stygobromus phreaticus*), and the copepod *Acanthocyclops columbiensis* as endangered under the Endangered Species Act of 1973, as amended. We find the petition does not provide substantial scientific or commercial information indicating that listing of these three crustaceans may be warranted. Therefore, we will not initiate a further status review in response to this petition. We ask the public to submit to us any new information that becomes available concerning the status of these species, or threats to them or their habitat, at any time. This information will help us monitor and encourage the conservation of these species.

**DATES:** The finding announced in this document was made on September 11, 2007.

**ADDRESSES:** The supporting file for this finding is available for public inspection, by appointment, during

normal business hours at the Chesapeake Bay Field Office, U.S. Fish and Wildlife Service, 177 Admiral Cochrane Drive, Annapolis, MD 21401. New information, materials, comments, or questions concerning this species may be submitted to us at any time at the above address.

**FOR FURTHER INFORMATION CONTACT:** John Wolflin, Field Supervisor, Chesapeake Bay Field Office (see **ADDRESSES**) (telephone 410-573-4574; facsimile 410-269-0832). People who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 800-877-8339.

**SUPPLEMENTARY INFORMATION:****Background**

Section 4(b)(3)(A) of the Endangered Species Act, as amended (Act) (16 U.S.C. 1531 *et seq.*), requires that the Service make a finding on whether a petition to list, delist, or reclassify a species presents substantial scientific or commercial information indicating that the petitioned action may be warranted. We base this finding on information provided in the petition, supporting
