Title: Federal-State Joint Board on Universal Service, CC Docket No. 96–45, Report and Order, 70 FR 29960, May 25, 2005.

Form No.: N/A.

Estimated Annual Burden: 22 responses; 242 total annual burden hours; approximately 11 hours average per respondent.

Needs and Uses: In the Report and Order, the Commission adopted additional mandatory requirements for eligible telecommunication carrier (ETC) designation proceedings in which the Commission acts pursuant to section 214(e)(6) of the Communications Act of 1934, as amended (the Act). Consistent with the recommendations of the Federal-State Joint Board on Universal

Service, and expanding the mandatory requirements, the Commission adopted rules 54.202 and 54.209, 47 CFR 54.202, 54.209, which imposed additional requirements for designation and annual certifications. These requirements ensure that ETCs continue to comply with the conditions of the ETC designation and that universal service funds are used for their intended purposes. Specifically, every ETC must submit, on an annual basis: (1) Progress reports on the ETC's five-year service quality improvement plan; (2) detailed information on any outage lasting at least 30 minutes; (3) the number of unfulfilled requests for service from potential customers within its service areas; (4) the number of complaints per 1,000 handsets or lines; (5) certification that the ETC is complying with applicable service quality standards and consumer protection rules; (6) certification that the ETC is able to function in emergency situations; (7) certification that the ETC is offering a local usage plan comparable to that offered by the incumbent local exchange carrier (LEC) in the relevant service areas; and (8) certification that the carrier acknowledges that the

Commission may require it to provide equal access within the service area. The Commission will use the information collected to ensure that each ETC satisfies its obligation under section 214(e) of the Act to provide services supported by the universal service mechanism throughout the area for which each ETC is designation. The Commission published notice of this OMB approval in the **Federal Register** on November 2, 2005, 70 FR 66407, November 2, 2005.

Several of the background documents for the ALWTRP and the take reduction planning process can be downloaded from the ALWTRP web site at <http://www.nero.noaa.gov/whaletrp/>.

Background

The ALWTRP was developed pursuant to section 118 of the Marine Mammal Protection Act (MMPA) to reduce the incidental mortality and serious injury of three endangered species of whales (right, fin, and humpback) due to incidental interaction with commercial fishing activities. In addition, the measures identified in the ALWTRP would provide conservation benefits to a fourth species (minke), which are neither listed as endangered nor threatened under the Endangered Species Act (ESA). The ALWTRP, implemented through regulations codified at 50 CFR 229.32, relies on a combination of fishing gear modifications and time/area closures to reduce the risk of whales becoming entangled in commercial fishing gear (and potentially suffering serious injury or mortality as a result).

On January 9, 2002, NMFS published the final rule to implement the ALWTRP's DAM program (67 FR 1133). On August 26, 2003, NMFS amended the regulations by publishing a final rule, which specifically identified gear modifications that may be allowed in a DAM zone (68 FR 51195). The DAM program provides specific authority for NMFS to restrict temporarily on an expedited basis the use of lobster trap/pot and anchored gillnet fishing gear in areas north of 40° N. lat. to protect right
