Amy Hapemen or Brandy Belmas, (301)713-2289.

SUPPLEMENTARY INFORMATION:

The subject permit is requested under the authority of section 104(c)(6) of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216). Section 104(c)(6) provides for photography for educational or commercial purposes involving non-endangered and non-threatened marine mammals in the wild. NMFS is currently working on proposed regulations to implement this provision. However, in the meantime, NMFS has received and is processing this request as a "pilot" application for Level B Harassment of non-listed and non-depleted marine mammals for photographic purposes.

The applicant has requested a photography permit to film human interactions with spinner dolphins in the coastal waters of Hawaii and Maui. The purpose of the filming is to produce a public service announcement to educate residents and tourists of the Hawaiian Islands about the dangers that swim-with programs pose to the species and illustrate proper dolphin watching techniques. Up to 2,710 dolphins could be harassed annually during aerial and vessel-based close approaches for filming, including underwater filming. Filming would occur from March to October of each year over a period of 4 years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: March 17, 2008.

P. Michael Payne,

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.
