SUPPLEMENTARY INFORMATION:

Title: Phytosanitary Export Certification.

OMB Number: 0579-0052.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS), among other things, provides export certification services to assure other countries that the plants and plant products they are receiving from the United States are free of plant pests specified by the receiving country.

It should be noted that our regulations do not require that we engage in export certification activities. We perform this work as a service to exporters who are shipping plants or plant products to countries that require phytosanitary certification as a condition of entry.

To request that we perform a phytosanitary inspection, an exporter must complete and submit an Application for Inspection and Certification of Plants and Plant Products for Export (PPQ Form 572).

After assessing the condition of the plants or plant products intended for export (i.e., after conducting a phytosanitary inspection), an inspector (who may be an APHIS employee or a State or county plant regulatory official) will issue an internationally recognized phytosanitary certificate (PPQ Form 577), a phytosanitary certificate for reexport (PPQ Form 579), or an export certificate for processed plant products (PPQ Form 578).

These forms are critical to our ability to certify plants and plant products for export. Without them, we would be unable to conduct an export certification program.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.241330049 hours per response.

Respondents: U.S. growers, shippers, and exporters; State and county plant regulatory officials.

Estimated annual number of respondents: 13,000.

Estimated annual number of responses per respondent: 187.38461538.

Estimated annual number of responses: 2,436,000.

Estimated total annual burden on respondents: 587,880 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 1st day of April 2008.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

SUPPLEMENTARY INFORMATION:

Title: Endangered Species Regulations and Forfeiture Procedures.

OMB Number: 0579-0076.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), the United States Department of Agriculture (USDA) is responsible for enforcing provisions of the Act and the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) that pertain to the importation, exportation, or reexportation of plants.

As part of this mission, the Animal and Plant Health Inspection Service (APHIS), USDA, administers regulations at 7 CFR part 355, "Endangered Species Regulations Concerning Terrestrial Plants." In accordance with these regulations, any individual, nursery, or other entity wishing to engage in the business of importing, exporting, or reexporting terrestrial plants listed in the CITES regulations at 50 CFR 17.12 or 23.23 must obtain a protected plant permit from APHIS. Such entities include importers, exporters, or reexporters who sell, barter, collect, or otherwise exchange or acquire terrestrial plants as a livelihood or enterprise engaged in for gain or profit. The requirement does not apply to persons engaged in business merely as carriers or customhouse brokers.

To obtain a protected plant permit, entities must complete an application (PPQ Form 621) and submit it to APHIS for approval. When a permit has been issued, the plants covered by the permit may be imported into the United States, exported, or reexported, provided they are accompanied by documentation required by the regulations and provided all other conditions of the regulations are met.

Effectively regulating entities who are engaged in the business of importing, exporting, or reexporting endangered species of terrestrial plants requires the use of this application process, as well as the use of other information collection activities, such as notifying APHIS of the impending importation, exportation, or reexportation of the
