Needs and Uses: Congress has mandated that after February 17, 2009, full-power television broadcast stations must transmit only in digital signals, and may no longer transmit analog signals. On December 31, 2007, the Commission released a Report and Order, In the Matter of the Third Periodic Review of the Commission's Rules and Policies Affecting the Conversion to Digital Television, MB Docket No. 07-91, FCC 07-228. In the Report and Order, the Commission adopted rules to ensure that, by the February 17, 2009 transition date, all full-power television broadcast stations (1) cease analog broadcasting and (2) complete construction of, and begin operations on, their final, full-authorized post-transition (DTV) facility. The Commission recognized that broadcasters may need regulatory flexibility in order to achieve these goals. Accordingly, the Commission authorized the following "DTV Transition-related" filings, which must be made electronically via the FCC's Consolidated Database System ("CDBS"), to permit broadcasters to

request and obtain regulatory flexibility from the Commission, if necessary, to meet their DTV construction deadlines:

- *STA for Phased Transition and Continued Interim Operations.* Stations may file a request for Special Temporary Authorization (STA) approval to temporarily remain on their in-core, pre-transition DTV channel after the transition date through the CDBS using the Informal Application Filing Form.

- *STA for Phased Transition/Build-Out.* Stations may file a request for STA approval to build less than full, authorized post-transition facilities by the transition date through the CDBS using the Informal Application Filing Form.

- *STA for Permanent Service Reduction or Termination.* Stations may file a request for STA approval to permanently reduce or terminate analog or pre-transition DTV service where necessary to facilitate construction of final, post-transition facilities through the CDBS using the Informal Application Filing Form.

- *Notification/Informal Letter of Temporary Service Disruption.* Stations may file a notification or informal letter pursuant to 47 CFR 73.1615 to temporarily reduce or cease existing analog or pre-transition DTV service where necessary to facilitate construction of final, post-transition facilities through the CDBS using the Informal Application Filing Form.

- *Notification of Service Reduction or Termination.* Stations may file a notification to permanently reduce or terminate analog or pre-transition DTV service within 90 days of the transition date through the CDBS using the Informal Application Filing Form.

- *Informal Filings.* Stations claiming a "unique technical challenge" warranting a February 17, 2009 construction deadline may file a notification to document their status through the CDBS using the Informal Application Filing Form.

47 CFR 73.1635 states that broadcast stations (licensees or permittees) may file a request for Special Temporary Authority (STA) approval to permit a station to operate a broadcast facility for a limited period at a specified variance from the terms of the station's authorization or requirements of the FCC rules. Stations may file a request for STA approval for a variety of reasons. The request must describe the operating modes and facilities to be used.

Proposed Project

Evaluation Models to Assess Patient Perspectives on Opt-out HIV testing in Clinical Settings—New—National

Center for HIV, Viral Hepatitis, STD and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

In 2006, CDC published the *Revised Recommendations for HIV Testing of Adults, Adolescents and Pregnant Women in Health Care Settings* which recommends routine, opt-out HIV testing to persons 13–64 years of age in health care settings. The goal of this project is to develop evaluation models for health care providers in a variety of settings to independently assess the effect that expanded HIV screening activities have on patient attitudes toward and acceptance of HIV testing.

The evaluation models will be packaged into a toolkit containing educational materials, administrative tools and a model questionnaire to measure patients' perceptions of their ability to decline testing, the sufficiency and effectiveness of methods used to impart information prior to testing, and satisfaction with the testing process.

As part of the development of a model questionnaire for inclusion in the toolkit, three health care settings (a hospital emergency department, a private primary care practice and a public primary care practice) will be selected to pilot test the questionnaire. In each health care site, 150 patients will be asked to voluntarily complete a brief computer assisted self interview regarding their experience with the HIV testing process during their health care visit.

Collection of data will include information on patient demographics and current behaviors that may facilitate HIV transmission; perceptions regarding pressure to take the test; confidentiality and privacy during testing; and patient satisfaction and acceptance of opt-out HIV testing. For persons who refused HIV testing during their visit, information about refusal will be collected.

Results from the three pilot sites will be assessed to understand issues of feasibility of the model questionnaire and validity of the included items and scales. The findings from the three site evaluations will be used to improve the model questionnaire and protocols included in the evaluation models toolkit.

CDC plans to complete data collection in 3 health care settings in one year. CDC estimates that 188 patients will be asked to participate at each site during the one year of data collection and that 80% will accept, resulting in approximately 450 new survey respondents across all sites. The average
