NUCLEAR REGULATORY COMMISSION

10 CFR Part 73

[Docket No. PRM-73-11; NRC-2001-0023]

Petition for Rulemaking Filed by Scott Portzline, Three Mile Island Alert; Consider Petition in the Rulemaking Process

AGENCY: Nuclear Regulatory Commission.

ACTION: Resolution and closure of petition docket.

SUMMARY: The Nuclear Regulatory Commission (NRC) is considering the issues raised in a petition for rulemaking submitted by Scott Portzline, on behalf of the Three Mile Island Alert, in the ongoing "Power Reactor Security Requirements" rulemaking. The petitioner requested that the NRC regulations governing physical protection of plants and materials be amended to require NRC licensees to post at least one armed guard at each entrance to the "owner controlled areas" (OCAs) surrounding all U.S. nuclear power plants. The petitioner stated that this should be accomplished by adding armed site protection officers (SPOs) to the security forces—not by simply moving SPOs from their protected area (PA) posts to the OCA entrances. The petitioner believes that its proposed amendment would provide an additional layer of security that would complement existing measures against radiological sabotage and would be consistent with the long-standing principle of defense-in-depth.

DATES: The docket for the petition for rulemaking PRM-73-11 is closed on July 29, 2008.

David Lochbaum, Union of Concerned Scientists; Consideration of Petition in the Rulemaking Process

AGENCY: Nuclear Regulatory Commission.

ACTION: Resolution and closure of petition docket.

SUMMARY: The Nuclear Regulatory Commission (NRC) is considering the issues raised in a petition for rulemaking submitted by David Lochbaum, on behalf of the Union of Concerned Scientists, in the ongoing "Power Reactor Security Requirements" rulemaking. The petitioner requested that the NRC amend its regulations to require that licensees implement procedures to ensure that when information becomes known to a licensee about an individual that would prevent that individual from gaining unescorted access to the protected area of a nuclear power plant, the licensee will implement measures to ensure the individual does not enter the protected area, whether escorted, or not; and, when sufficient information is not available to a licensee about an individual to determine whether the criteria for unescorted access are satisfied, the licensee will implement measures to allow that individual to enter the protected area only when escorted at all times by an armed member of the security force who remains in periodic communication with security supervision.
