BILLING CODE 4510-FN-P

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-62,043]

Synergis Technologies Group Corporation, Dielink International Development; Including On-Site Leased Workers from Forge Industrial Staffing, All Performance Staffing and Aerotek Grand Rapids, Michigan; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273), and section 246 of the Trade Act of 1974 (26 U.S.C. 2813), as amended, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance on September 17, 2007, applicable to workers of Synergis Technologies Group Corporation, including on-site leased workers from Forge Industrial Staffing, and All Performance Staffing, Grand Rapids, Michigan. The notice was published in the **Federal Register** on October 3, 2007 (72 FR 56385).

At the request of petitioners, a company official and a state agency representative, the Department reviewed the certification for workers of the subject firm. The workers were engaged in the production of metal stamping dies.

New information provided by the company shows that the worker group includes those employees of Synergis Technologies Group Corporation divisions known as Dielink International and Dievelopment. These two divisions are located at different street addresses in Grand Rapids, but are engaged in employment related to the production of metal stamping dies. Furthermore, the Unemployment Insurance (UI) wage account for these divisions is reported under Synergis

Technologies Group Corporation. The company official also confirms that the worker group includes on-site leased workers from Aerotech. The Department has determined that the Aerotech workers were sufficiently under the control of Synergis Technologies Group Corporations.

Based on these findings, the Department is amending this certification to include workers of Dielink International, Dievelopment, and workers from Aerotech working on-site at the Grand Rapids, Michigan locations of the subject firm.

The intent of the Department's certification is to include all workers employed at Synergis Technologies Group Corporation, Grand Rapids, Michigan who were adversely-impacted by a shift in production of metal stamping dies to China.

The amended notice applicable to TA-W-62,043 is hereby issued as follows:

"All workers of Synergis Technologies Group Corporation, Dietech International and Dievelopment, Grand Rapids, Michigan, including on-site leased workers from Forge Industrial Staffing, All Performance Staffing and Aerotek, who became totally or partially separated from employment on or after August 24, 2006, through September 17, 2009, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under Section 246 of the Trade Act of 1974."

Signed at Washington, DC, this 14th day of January 2008.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

BILLING CODE 4510-FN-P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of petitions for modification of existing mandatory safety standards.

SUMMARY: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and 30 CFR Part 44 govern the application, processing, and disposition of petitions for modification. This notice is a summary of petitions for modification filed by the parties listed below to modify the application of existing mandatory safety standards published in Title 30 of the Code of Federal Regulations.

DATES: All comments on the petitions must be received by the Office of Standards, Regulations, and Variances on or before February 25, 2008.

ADDRESSES: You may submit your comments, identified by "docket number" on the subject line, by any of the following methods:

1. *Electronic mail:* Standards-Petitions@dol.gov.
2. *Facsimile:* 1-202-693-9441.
3. *Regular Mail:* MSHA, Office of Standards, Regulations, and Variances, 1100 Wilson Boulevard, Room 2349, Arlington, Virginia 22209, Attention: Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances.
4. *Hand-Delivery or Courier:* MSHA, Office of Standards, Regulations, and Variances, 1100 Wilson Boulevard, Room 2349, Arlington, Virginia 22209, Attention: Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances.

We will consider only comments postmarked by the U.S. Postal Service or proof of delivery from another delivery service such as UPS or Federal Express on or before the deadline for comments. Individuals who submit comments by hand-delivery are required to check in at the receptionist desk on the 21st floor.

Individuals may inspect copies of the petitions and comments during normal business hours at the address listed above.

FOR FURTHER INFORMATION CONTACT:

Edward Sexauer, Chief, Regulatory Development Division at 202-693-9444 (Voice), sexauer.edward@dol.gov (E-mail), or 202-693-9441 (Telefax), or contact Barbara Barron at 202-693-9447 (Voice), barron.barbara@dol.gov (E-mail), or 202-693-9441 (Telefax). [These are not toll-free numbers].

SUPPLEMENTARY INFORMATION:**I. Background**

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary determines that: (1) An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or (2) that the application of such standard to such mine will result in a diminution of safety to the miners in such mine. In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modifications.

II. Petitions for Modification

Docket Number: M-2007-069-C.

Petitioner: Cumberland River Coal Company, Pardee Complex, P.O. Drawer 109, Appalachia, Virginia 24216.

Mine: Dogwood #2 Mine, MSHA I.D. No. 44-07018, located in Wise County, Virginia.

Regulation Affected: 30 CFR 77.214(a) (Refuse piles; general).

Modification Request: The petitioner proposes to place refuse rock from preparation plant operations over the abandoned portals of the Old Dominion Energy, Inc., Dogwood #2 Mine and is requesting modification of the existing standard to allow extension of refuse site 1211-VA5-0286-82 to that area. The petitioner states that: (1) Modification of the existing standard would not jeopardize the safety of the miners at the mine or the disposal area; (2) no miners have been working in the mine since it has been abandoned; (3) there are four mine openings in the area planned for placement of refuse rock; (4) the openings are in the Low Split D seam at an elevation of 2,460 feet; and (5) the site is lower in elevation than the mine openings. The petitioner has listed in this petition specific steps that will be followed when sealing the abandoned mine openings in preparation for placement of refuse rock. Persons may review a complete description of the proposed steps and

procedures at the MSHA address listed in the notice. The petitioner asserts that the proposed preparation for refuse rock placement will maintain the same level of safety as the existing standard.

Docket Number: M-2007-070-C.

Petitioner: White County Coal, LLC, P.O. Box 457, Carmi, Illinois 62821.

Mine: Pettiki Mine, MSHA I.D. No. 11-03058, located in White County, Illinois.

Regulation Affected: 30 CFR 75.503 (Permissible electric face equipment; maintenance) and 30 CFR 18.35 (Portable (trailing) cables and cords).

Modification Request: The petitioner requests a modification of the existing standard to increase the maximum length of cables supplying power to permissible equipment used in continuous mining sections. The petitioner states that: (1) This petition will only apply to trailing cables supplying three-phase, 995-volt power to continuous mining machines and trailing cables supplying three-phase, 480-volt power to roof bolters; (2) the maximum length of the 995-volt continuous mining machine trailing cables will be 950 feet and the maximum length of the 480-volt trailing cables for roof bolters will be 900 feet; (3) 995-volt continuous mining machine trailing cables will not be smaller than 2/0 and the 480-volt trailing cables for roof bolters will not be smaller than #2 American Wire Gauge (AWG); (4) all circuit breakers used to protect 2/0 trailing cables exceeding 850 feet in length will have instantaneous trip units calibrated to trip at 1,500 amperes and the trip setting will be sealed or locked and will have permanent legible permanent labels that will be maintained as legible to identify the circuit breaker as being suitable for protecting 2/0 cables; (5) replacement instantaneous trip units, used to protect 2/0 trailing cables, will be calibrated to trip at 1,500 amperes and the setting will be sealed or locked; (6) all circuit breakers used to protect #2 AWG trailing cables exceeding 700 feet in length will have instantaneous trip units calibrated to trip at 800 amperes, the trip setting will be sealed or locked, and the circuit breakers will have permanent legible labels that will be maintained as legible to identify the circuit breakers as being suitable for protecting #2 AWG cables; (7) replacement instantaneous trip units used to protect #2 AWG trailing cables will be calibrated to trip at 800 amperes and the setting will be sealed or locked; (8) the designated operator will visually examine the trailing cables during each production day to ensure that the cables are operating safely and the instantaneous

settings of the calibrated breakers do not have seals or locks removed and do not exceed the stipulated settings; (9) any trailing cable that is not in safe operating condition will be removed from service immediately and repaired or replaced; and (10) splices or repairs shall be workmanlike, in accordance with manufacturer's instructions and 30 CFR 75.603 and 75.604. Persons may review a complete description of petitioner's alternative method and procedures at the MSHA address listed in the notice. The petitioner states that the alternative method will not be implemented until miners designated to examine the integrity of the seals or locks verify the short-circuit settings, and proper procedures training have been provided for examining trailing cables for defects and damage. The petitioner further states that the miners will be trained in the terms and conditions of the Proposed Decision and Order, and within 60 days the petitioner will submit revisions of its Part 48 training plan to the District Manager that includes task training to comply with the final order. The petitioner asserts that the proposed alternative method will at all times guarantee no less than the same measure of protection to the miners.

Docket Number: M-2007-071-C.

Petitioner: Independence Coal Company.

Mine: Allegiance Mine, MSHA I.D. No. 46-08735, located in Boone County, West Virginia.

Regulation Affected: 30 CFR 75.1002 (Installation of electric equipment and conductors; permissibility).

Modification Request: The petitioner requests a modification of the existing standard to permit the use of a 2400-volt power center to power a continuous miner with high-voltage trailing cable in by the last open crosscut and within 150 feet of pillar workings. The petitioner has listed in this petition specific steps that will be followed. Persons may review a complete description of the proposed steps and procedures at the MSHA address listed in this notice. The petitioner asserts that the proposed alternative method will at all times guarantee no less than the same measure of protection afforded the miners at the mine by the existing standard.

Docket Number: M-2007-072-C.

Petitioner: Harlan-Cumberland Coal Company, LLC, P.O. Box 269, Grays Knob, Kentucky 40829.

Mine: Totz Preparation Plant, MSHA I.D. No. 15-10657, and Coarse Coal Refuse Fill #1, located in Harlan County, Kentucky.

Regulation Affected: 30 CFR 77.214 (Refuse piles; general).

Modification Request: The petitioner requests a modification of the existing standard to permit coarse refuse fill to be constructed over abandoned underground mine openings because the mines are abandoned and all reserves in these mines have been depleted. The petitioner states that: (1) There are no safety issues that might affect any underground miners; (2) surface workers at the coal preparation plant will be protected by clearly identifying the openings and insuring that the openings are sealed and/or provided drainage. The petitioner further states that: (1) The openings at issue have been abandoned since as early as the mid-1900's and as late as the late 1990's and represent no threat to underground miners because all of the affected mine workings/openings are abandoned; (2) there are no active underground mine workings above or below the abandoned coal seams in this area; and (3) there are no active workings within 2,000 feet of the coarse refuse fill. The petitioner asserts that the proposed alternative method will achieve and guarantee the same measure of protection afforded by the standard.

Dated: January 17, 2008.

Jack Powasnik,

Deputy Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4510-43-P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 08-010]

Notice of Information Collection

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of information collection.

SUMMARY: The National Aeronautics and Space Administration, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. 3506(c)(2)(A)).

DATES: All comments should be submitted within 60 calendar days from the date of this publication.

ADDRESSES: All comments should be addressed to Dr. Walter Kit, National Aeronautics and Space Administration, Washington, DC 20546-0001.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Dr. Walter Kit, NASA PRA Officer, NASA Headquarters, 300 E Street SW., JE0000, Washington, DC 20546, (202) 358-1350, *Walter.Kit-1@nasa.gov*.

SUPPLEMENTARY INFORMATION:

I. Abstract

Contractors performing research and development are required by statutes, NASA implementing regulations, and OMB policy to submit reports of inventions, patents, data, and copyrights, including the utilization and disposition of same. The NASA New Technology Summary Report reporting form is being used for this purpose.

II. Method of Collection

NASA FAR Supplement clauses for patent rights and new technology encourage the contractor to use an electronic form and provide a hyperlink to the electronic New Technology Reporting Web (eNTRe) site <http://invention.nasa.gov>. This website has been set up to help NASA employees and parties under NASA funding agreements (*i.e.*, contracts, grants, cooperative agreements, and subcontracts) to report new technology information directly, via a secure Internet connection, to NASA.

III. Data

Title: NASA FAR Supplement, Part 1827, Patents, Data, and Copyrights.

OMB Number: 2700-0052.

Type of review: Extension of a currently approved collection.

Affected Public: Business or other for-profit, not-for-profit institutions, Federal Government, and State, Local or Tribal Government.

Estimated Number of Respondents: 1016.

Estimated Time Per Response: 0.166 hour.

Estimated Total Annual Burden Hours: 3,391.

Estimated Total Annual Cost: \$0.

IV. Request for Comments

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of NASA, including whether the information collected has practical utility; (2) the accuracy of NASA's estimate of the burden (including hours and cost) of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the

burden of the collection of information on respondents, including automated collection techniques or the use of other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval of this information collection. They will also become a matter of public record.

Gary Cox,

Executive Officer.
