

FOR FURTHER INFORMATION CONTACT: Malcolm Mohead or Brandy Belmas, (301)713-2289.

SUPPLEMENTARY INFORMATION: On February 21, 2008, notice was published in the *Federal Register* (73 FR 9525) that a request for a scientific research permit to take shortnose sturgeon had been submitted by the above-named individual. The requested permit has been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

Dr. Douglas Peterson is authorized to conduct a five-year scientific research (presence/absence) study of shortnose sturgeon in the Saint Marys and Satilla Rivers, Georgia and Florida. The purpose of the proposed research is to assess the current status of shortnose sturgeon in these rivers, as well as evaluate the current habitat availability in each river. If shortnose sturgeon are found, another objective of the research will be to quantify the genetic discreteness and effective population size of the extant stock.

Specifically, Dr. Peterson is authorized to capture (by gill or trammel nets), handle, measure, weigh, PIT tag, and genetic fin clip up to 85 shortnose sturgeon annually from each river for the duration of the permit, or five years. To document spawning in the rivers, up to 20 eggs or larvae may be lethally collected in each river with artificial substrates. No unintentional mortality for either river is authorized.

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of such endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: August 25, 2008.

P. Michael Payne,

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.
