there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and the Confederated Tribes of the Umatilla Indian Reservation, Oregon.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains should contact Dr. David McMurray, Oregon State University, Department of Anthropology, 238 Waldo Hall, Corvallis, OR 97331, telephone (541) 737–3850, before April 13, 2009. Repatriation of the human remains to the Confederated Tribes of the Umatilla Indian Reservation, Oregon may proceed after that date if no additional claimants come forward.

The Oregon State University, Department of Anthropology is responsible for notifying the Burns Paiute Tribe of the Burns Paiute Indian Colony of Oregon; Confederated Tribes of the Colville Reservation, Washington; Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians of Oregon; Confederated Tribes of the Grande Ronde Community of Oregon; Confederated Tribes of the Siletz Reservation, Oregon; Confederated Tribes of the Umatilla Indian Reservation, Oregon; Confederated Tribes of the Warm Springs Reservation of Oregon; Coquille Tribe of Oregon; Cow Creek Band of Umpgua Indians of Oregon; and Klamath Tribes, Oregon that this notice has been published.

Dated: February 4, 2009.

Manager, National NAGPRA Program. [FR Doc. E9–5339 Filed 3–11–09; 8:45 am] BILLING CODE 4312-50-S

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: U.S. Department of the Interior, National Park Service, San Juan Island National Historical Park, Friday Harbor, WA and Thomas Burke Memorial Washington State Museum, University of Washington, Seattle, WA; Correction

AGENCY: National Park Service, Interior. **ACTION:** Notice; correction.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects in the possession of the Thomas Burke Memorial Washington State Museum (Burke Museum), University of Washington, Seattle, WA, and in the control of the U.S. Department of the Interior, National Park Service, San Juan Island National Historical Park, Friday Harbor, WA. The human remains and associated funerary objects were removed from four prehistoric archeological sites within the boundaries of San Juan Island National Historical Park, San Juan County, WA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations in this notice are the sole responsibility of the superintendent, San Juan Island National Historical Park.

This notice corrects the number of associated funerary objects reported in two previously published notices: Notice of Inventory Completion (73 FR 41379–41380, July 18, 2008); and corrected Notice of Inventory Completion (73 FR 51512–51513, September 3, 2008). This notice replaces both the original Notice of Inventory Completion of July 18, 2008 and the corrected Notice of Inventory Completion of September 3, 2008.

A detailed assessment of the human remains and associated funerary objects was made by Burke Museum and San Juan Island National Historical Park professional staff in consultation with representatives of the Lummi Tribe of the Lummi Reservation, Washington; Samish Indian Tribe, Washington; and Swinomish Indians of the Swinomish Reservation, Washington.

In 1946 and 1947, human remains representing a minimum of four individuals were removed from the Cattle Point Site (45-SJ-01) on San Juan Island in San Juan County, WA, during legally authorized excavations by University of Washington archeologist Arden King. Cattle Point is within the American Camp portion of San Juan Island National Historical Park on the southern part of San Juan Island. The human remains and associated funerary objects were transferred to the Burke Museum and accessioned by the National Park Service. No known individuals were identified. The two associated funerary objects are mammal bone fragments.

In 1950, human remains representing a minimum of two individuals were removed from the Guss Island Site (45– SJ–21) in San Juan County, WA, during legally authorized excavations as a part of University of Washington Field Project led by Adan Treganza. The human remains were transferred to the Burke Museum and accessioned by the National Park Service. No known individuals were identified. No associated funerary objects are present.

In 1983, human remains representing a minimum of one individual were removed from the Guss Island Site (45-SJ–21) in San Juan County, WA, during legally authorized excavations by University of Washington Professor Julie Stein. The human remains and associated funerary objects were transferred to the Burke Museum and accessioned by the National Park Service. Guss Island is a small island in Garrison Bay and is within the English Camp portion of San Juan Island National Historical Park on the northwestern part of San Juan Island. No known individual was identified. The nine associated funerary objects are one deer vertebra fragment, one deer tibia, one bird coracoid bone, one bird humerus, two fish bones, and three pieces of fire modified rock.

In 1950, human remains representing a minimum of seven individuals were removed from the English Camp Site (45–SJ–24) in San Juan County, WA, during a University of Washington summer field school directed by Professor Adan Treganza of San Francisco State University. The human remains and associated funerary objects were transferred to the Burke Museum and accessioned by the National Park Service. No known individuals were identified. The 27 associated funerary objects are 1 broken chipped stone projectile point and 26 non-human bone fragments.

In 1970, 1971, and 1972, human remains representing a minimum of eight individuals were removed from the English Camp Site in San Juan County, WA, during University of Idaho field schools directed by Dr. Roderick Sprague. The human remains and associated funerary objects were transferred to the Burke Museum and accessioned by the National Park Service. No known individuals were identified. The 58 associated funerary objects are 1 splinter awl made from deer bone, 1 tip of an antler tine, 1 square nail fragment, 1 wood fragment, 1 Horse Clam shell fragment, 6 basalt flakes, and 47 non-human skeletal fragments and non-human teeth.

In 1984, 1988, and 1990, human remains representing a minimum of five individuals were removed from the English Camp Site in San Juan County, WA, during legally authorized excavations by Professor Julie Stein of the University of Washington. The human remains and associated funerary objects were transferred to the Burke Museum and accessioned by the National Park Service. No known individuals were identified. The 27 associated funerary objects are nonhuman bone fragments.

In 1951, human remains representing a minimum of seven individuals were removed from the North Garrison Bay Site (45-SJ-25) in San Juan County, WA, during a summer field school in archeology under the direction of Professor Carroll Burroughs of the University of Washington. The North Garrison Bay Site is a prehistoric village site north of both the Guss Island Site and English Camp Site referred to previously. The fragmentary human remains were transferred to the Burke Museum and accessioned by the National Park Service. No known individuals were identified. The 11 associated funerary objects are 1 shell fragment, 1 fused non-human radius and ulna, 1 deer ulna, 1 carnivore mandible fragment, 1 non-human rib fragment, 2 non-human bone fragments, and 4 lots of organic matter.

Based upon non-destructive osteological analysis, archeological data, geographic context and accession data, the 34 individuals from the four San Juan Island sites are of Native American ancestry. Arden King's analysis of archeological data from Cattle Point resulted in the identification of three prehistoric phases, with the most recent representing a maritime adaptation that is ancestral to historic native populations in the United States and Canada. Archeological research and analysis indicates continuous habitation of San Juan Island, including the four sites mentioned here, from approximately 2,000 years ago through the mid-19th century. Anthropologist Wavne Suttles has identified the occupants of San Juan Island as Northern Straits language-speaking people, a linguistic subset of a larger Central Coast Salish population, who were ancestors of the Lummi Tribe of the Lummi Reservation, Washington. Furthermore, Suttles' anthropological research in the late 1940s confirmed that the Lummi primarily occupied San Juan Island and other nearby islands in the contact period and during the early history of the Lummi Reservation that was established on the mainland in 1855 through Article II of the Treaty of Point Elliott. San Juan Island is within the aboriginal territory of the Lummi Tribe of the Lummi Reservation, Washington. Lummi oral tradition, history and anthropological data clearly associate the Lummi with San Juan Island.

The Samish Indian Tribe, Washington is closely associated with the Lummi Tribe of the Lummi Reservation, Washington linguistically and culturally, and the Samish regard San Juan Island to be within the usual and accustomed territory shared by both

tribes at the time of the Point Elliott Treaty negotiations in 1855. In 2006, the Samish Indian Tribe, Washington and the Lummi Tribe of the Lummi Reservation, Washington entered into a cooperative agreement to have the Lummi Tribe of the Lummi Reservation, Washington take the lead in receiving repatriated human remains and funerary objects from San Juan Island National Historical Park. The traditional territory of the Swinomish Indians of the Swinomish Reservation, Washington is on the mainland in the vicinity of La Conner, WA, on Whidbey Island and Fidalgo Island, the site of their reservation.

Officials of San Juan Island National Historical Park have determined that, pursuant to 25 U.S.C. 3001 (9-10), the human remains described above represent the physical remains of 34 individuals of Native American ancestry. Officials of San Juan Island National Historical Park also have determined that, pursuant to 25 U.S.C. 3001 (3)(A), the 134 associated funerary objects are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of San Juan Island National Historical Park have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and the Lummi Tribe of the Lummi Reservation, Washington.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains and associated funerary objects should contact Peter Dederich, superintendent, San Juan Island National Historical Park, P.O. Box 429, Friday Harbor, WA 98250–04289, telephone (360) 378– 2240, before April 13, 2009. Repatriation of the human remains and associated funerary objects to the Lummi Tribe of the Lummi Reservation, Washington may proceed after that date if no additional claimants come forward.

San Juan Island National Historical Park is responsible for notifying the Lummi Tribe of the Lummi Reservation, Washington; Samish Indian Tribe, Washington; and Swinomish Indians of the Swinomish Reservation, Washington that this notice has been published.

Dated: February 12, 2009.

Sangita Chari,

Acting Manager, National NAGPRA Program. [FR Doc. E9–5321 Filed 3–11–09; 8:45 am] BILLING CODE 4312–50–S

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: U.S. Department of the Interior, Utah State Office of the Bureau of Land Management, Salt Lake City, UT; Museum of Peoples and Cultures, Brigham Young University, Provo, UT; College of Eastern Utah Prehistoric Museum, Price, UT; Edge of the Cedars State Park Museum, Blanding, UT; Utah Museum of Natural History, University of Utah, Salt Lake City, UT; and Anthropology Museum at Washington State University, Pullman, WA

AGENCY: National Park Service, Interior. **ACTION:** Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects in the control of the U.S. Department of the Interior, Utah State Office, Bureau of Land Management, Salt Lake City, UT, and in the possession of the Museum of Peoples and Cultures, Brigham Young University, Provo, UT; College of Eastern Utah Prehistoric Museum, Price, UT; Edge of the Cedars State Park Museum, Blanding, UT; Utah Museum of Natural History, University of Utah, Salt Lake City, UT; and Anthropology Museum at Washington State University, Pullman, WA. The human remains and associated funerary objects were removed from Carbon, Grand, Kane, San Juan, Sevier, Tooele, Washington, and Wayne Counties, UT, and from unknown locations in Utah.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

A detailed assessment of the human remains was made by Museum of Peoples and Cultures, Brigham Young University; College of Eastern Utah Prehistoric Museum; Edge of the Cedars State Park Museum; Utah Museum of Natural History, University of Utah; Anthropology Museum at Washington State University; and Utah State Office, Bureau of Land Management professional staff in consultation with representatives of the Confederated
