

adverse inference.” See *Antidumping Duties; Countervailing Duties*, 62 FR 27296, 27340 (May 19, 1997); see also *Nippon Steel Corp. v. United States*, 337 F.3d 1373, 1383 (Fed. Cir. 2003) (*Nippon*). Because: 1) the respondent had the necessary information within its control and it did not report this information; and 2) it failed to put forth its maximum effort to provide the requested information, we find that the respondent failed to cooperate to the best of its ability. Therefore, for the final determination, we are using facts available with an adverse inference and applying it to the gross unit prices of certain home market sales, and to all U.S. inland freight expenses. Specifically, as adverse facts available, we increased both the affected home market sales prices and the U.S. freight expenses by 1.16 percent, *i.e.*, the percentage difference between the Department’s weighted-average POI exchange rate (used to convert comparison-market values to USD in the margin program), and JBLT’s POI average exchange rate (used by JBLT’s SAP system for currency conversion purposes). For further discussion, see Decision Memo at Comment 4 and the April 6, 2009, Memorandum to The File from Case Analyst, entitled “Calculations Performed for Jungbunzlauer Technology GMBH & Co. KG for the Final Determination in the Antidumping Duty Investigation of Citric Acid and Certain Citrate Salts from Canada.”

#### Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, we are directing U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all imports of subject merchandise that are entered or withdrawn from warehouse, for consumption on or after November 20, 2008, the date of publication of the preliminary determination in the **Federal Register**. We will instruct CBP to continue to require a cash deposit or the posting of a bond for all companies based on the estimated weighted-average dumping margins shown below. The suspension of liquidation instructions will remain in effect until further notice.

#### Final Determination Margins

We determine that the following weighted-average dumping margins exist for the period April 1, 2007, through March 31, 2008:

Manufacturer/Exporter	Weighted Average Margin (percent)
JBL Canada, Inc. ....	23.21
All Others .....	23.21

#### All-Others Rate

Section 735(c)(5)(A) of the Act provides that the estimated “All-Others” rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero or *de minimis* margins, and any margins determined entirely under section 776 of the Act. In this investigation the Department calculated a company-specific rate only for JBL Canada Inc. Therefore, for purposes of determining the all-others rate and pursuant to section 735(c)(5)(A) of the Act, we are using the weighted-average dumping margin calculated for JBL Canada, Inc., as referenced above. See, *e.g.*, *Notice of Final Determination of Sales at Less Than Fair Value: Stainless Steel Sheet and Strip in Coils From Italy*, 64 FR 30750, 30755 (June 8, 1999); and *Coated Free Sheet Paper from Indonesia: Notice of Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination*, 72 FR 30753, 30757 (June 4, 2007), unchanged in final determination, *Notice of Final Determination of Sales at Less Than Fair Value: Coated Free Sheet Paper from Indonesia*, 72 FR 60636 (October 25, 2007).

#### Disclosure

We will disclose the calculations performed within five days of the date of publication of this notice to parties in this proceeding in accordance with 19 CFR 351.224(b).

#### International Trade Commission Notification

In accordance with section 735(d) of the Act, we have notified the International Trade Commission (ITC) of our final determination. As our final determination is affirmative, the ITC will determine within 45 days whether imports of the subject merchandise are causing material injury, or threat of material injury, to an industry in the United States. If the ITC determines that material injury or threat of injury does not exist, the proceeding will be terminated and all securities posted will be refunded or canceled. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing CBP to assess antidumping duties on all imports of the subject merchandise

entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation.

#### Return or Destruction of Proprietary Information

This notice will serve as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

We are issuing and publishing this determination and notice in accordance with sections 735(d) and 777(i) of the Act.

Dated: April 6, 2009.

**SUPPLEMENTARY INFORMATION:** The Caribbean Fishery Management Council will hold Scoping meetings to receive public input on the following management alternatives:

#### 4.0 MANAGEMENT ALTERNATIVES

The Management Alternatives for setting Annual Catch Limits (ACLs) for

4 species and species groups are presented below. The species groups for which Annual Catch Limits have to be set by 2010 are shown in the table below and include the Snapper Unit 1, Grouper Unit 4, parrotfish and queen conch. One species not discussed in the actions is Nassau grouper, which is undergoing overfishing and therefore, would require an ACL by 2010. No action is discussed for Nassau grouper because current regulations exist which prohibit the take of Nassau grouper in the U.S. Caribbean (both from the EEZ and state waters). Because of this prohibition on take, no further action is required to end or prevent overfishing. Similar to Nassau grouper, queen conch management alternatives are only discussed for the fishery in St. Croix. This is a result of current regulations in the U.S. Caribbean which prohibit the take of queen conch in the EEZ off Puerto Rico and St. Thomas/St. John.

Other actions among the Management Alternatives include methods for modifying the reef fish FMU, setting recreational ACLs, methods for accounting for uncertainty, alternative methods for setting ACLs based on proxies for reducing fishing mortality, accountability measures, monitoring and enforcement, permits, and allowable fishing gear.

#### 4.1 Action 1: Amending the Stock Complexes in the Reef Fish Fishery Management Unit

Alternative 1. No Action. Do not change the stock complexes in the Reef Fish FMU

Alternative 2. Modify the FMU by:

Sub-alternative A. Separating the Parrotfish Unit into 2 complexes. Parrotfish Unit 1 would include princess, queen, redbfin, redbtail, stoplight, redband, and striped parrotfishes and Parrotfish Unit 2 would include blue, midnight, and rainbow parrotfishes

Sub alternative B. Separate Grouper Unit 4 into 2 complexes and add black grouper to Grouper Unit 4. Grouper Unit 4 would include yellowfin, red, tiger, and black grouper and Grouper Unit 5 would include yellowedge and misty grouper.

Sub alternative C. Add cardinal snapper (*Pristipomoides macrophthalmus*) to Snapper Unit 2 (with the queen snapper) and move wenchman (*Pristopomoides aquilonaris*) into Snapper Unit 1.

Alternative 3. Examine reef fish FMU and reassign species not targeted, retained, sold, or used for personal consumption as ecosystem component species.
