April 9, 2009.

On April 8, 2009, the American Forest & Paper Association, the Process Gas Consumers Group, the Interstate Natural Gas Association of America, the Electric Power Supply Association, the Independent Petroleum Association of America, and the American Gas Association (the Associations) filed a joint motion for an extension of time for the initial filing of Form No. 552, as required by Commission Order Nos. 704, 704-A, and 704-B (Order No. 704).¹ The motion states that because many of the Associations' members are unfamiliar with reporting transactional data under the Commission's rules and because of questions about the requirements of Form No. 552, as well as informational system and data collection issues which must be addressed by the members, additional time is needed to submit the compliance filing.

Upon consideration, notice is hereby given that an extension of time for submitting the initial filing of Form 572

Title: NESHAP for Reinforced Plastic Composites Production (Renewal).

ICR Numbers: EPA ICR Number 1976.04, OMB Control Number 2060-0509.

ICR Status: This ICR is scheduled to expire on June 30, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9,

and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Reinforced Plastic Composites (RPC) Production Operations and Processes were proposed on August 2, 2001 (66 FR 40323), and promulgated on April 21, 2003 (68 FR 19375). These standards regulate fugitive emissions from reinforced plastic composites (RPC) production operations and processes resulting from hazardous air pollutants (HAPs) evaporating from the resins, gel coats, and cleaning solvents.

Owners and operators of affected sources are subject to the monitoring, recordkeeping and reporting requirements of 40 CFR part 63, subpart A, the General Provisions, unless specified otherwise in the regulation. This rule requires sources to submit initial notifications, conduct performance tests if source is using an add-on control device, and submit periodic compliance reports. In addition, sources are required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation if using an add-on control device; any period during which the monitoring system is inoperative; parametric monitoring data; system maintenance and calibration; and work practices to demonstrate initial and ongoing compliance with the regulation.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 16 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Reinforced plastic composites production facilities.

Estimated Number of Respondents: 504.

Frequency of Response: Initially, and semiannually.

Estimated Total Annual Hour Burden: 17,740.

Estimated Total Annual Cost: \$1,454,143, including: \$1,432,143 in annual labor costs, \$22,000 in O&M costs, and no annualized capital costs.

Changes in the Estimates: There is no change in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens.

Dated: April 13, 2009.

John Moses,

Acting Director, Collection Strategies Division.
