Agencies for purposes of carrying out responsibilities under programs funded under part A of Title IV of the Act. To assist OCSE and the Office of Family Assistance (OFA) in measuring savings to the TANF program attributable to the use of NDNH data matches, the State TANF Agencies have agreed to provide OCSE with a written description of the performance outputs and outcomes attributable to the State TANF Agency's use of NDNH match results. This information will help OCSE demonstrate how the NDNH supports the OCSE's mission and strategic goals.

Respondents: State TANF Agencies.

## Submission for OMB Review; Comment Request

*Title:* National Survey of Child and Adolescent Well-Being Second Cohort (NSCAW II).

OMB No.: 0970-0202.

Description: The Department of Health and Human Services (HHS) intends to collect follow-up data on a sample of children and families for the National Survey of Child and Adolescent Well-Being (NSCAW). The NSCAW was authorized under Section 427 of the Personal Responsibility and Work Opportunities Reconciliation Act of 1996. The NSCAW is the only source of nationally representative, firsthand information about the functioning and well-being, service needs, and service utilization of children and families who come to the attention of the child

welfare system. Information is collected about children's cognitive, social, emotional, behavioral, and adaptive functioning, as well as family and community factors that are likely to influence their functioning. Family service needs and service utilization also are addressed in the data collection.

Selection of the current NSCAW sample and baseline data collection began in 2007 with a final anticipated sample size of 5,700 children. The proposed data collection will allow for follow-up of this sample 18 months post-baseline, and will follow the same format as that used in the baseline round and will employ, with only modest revisions, the same instruments that were used in the previous round. Data from NSCAW are made available to the research community through licensing arrangements from the National Data Archive on Child Abuse and Neglect at Cornell University.

Respondents: Children and their associated permanent or foster caregivers, caseworkers, and teachers.

# Proposed Information Collection Activity; Comment Request

*Title:* Cross-Site Evaluation of the Children's Bureau Grantee.

Cluster: Supporting Evidence-Based Home Visiting Programs to Prevent Child Maltreatment (EBHV).

OMB No.: New Collection.
Description: The Administration for Children and Families (ACF), U.S.
Department of Health and Human
Services (HHS), is proposing this crosssite evaluation data collection activity to identify successful strategies for adopting, implementing, and sustaining high-quality home visitation programs

to prevent child maltreatment. An evaluation study will address four domains: (1) Systems change to develop infrastructure, (2) fidelity to home visiting models, (3) costs, and (4) family and child outcomes (via a review of grantee analysis reports). A process study will focus on the broader grant initiative to understand how programs plan and develop the infrastructure needed to support home visitation services and how programs ensure service quality.

Information will be collected through biennial site visits, semi-annual progress reports, and monthly entries into a web-based data system. Site visits will include interviews with key grantee staff and stakeholders involved in the execution of the grant and in the efforts to make system changes. Progress report cross-site evaluation data will capture the costs of home visiting and provide additional information on systems change. Web-based data entry will include EBHV program and participant characteristics along with systems change updates on goals and operations every six months. Additionally, cross-
