

NUCLEAR REGULATORY COMMISSION

[NRC-2009-0008]

Final Memorandum of Understanding Between the U.S. Nuclear Regulatory Commission and the Virginia Department of Health**AGENCY:** Nuclear Regulatory Commission.**ACTION:** Notice.**FOR FURTHER INFORMATION CONTACT:**

Robert Stransky, Senior Emergency Response Coordinator, Operations Branch, Division of Preparedness and Response, Office of Nuclear Security and Incident Response, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone: (301) 415-6411; fax number: (301) 415-6382; e-mail: Robert.Stransky@nrc.gov.

SUPPLEMENTARY INFORMATION:**I. Introduction**

This notice is to advise the public of the issuance of a Final Memorandum of Understanding (MOU) between the U.S. Nuclear Regulatory Commission (NRC) and the Virginia Department of Health, an agency of the Commonwealth of Virginia. The MOU provides the basis for mutually agreeable procedures whereby the Virginia Department of Health may utilize the NRC Emergency Response Data System (ERDS) to receive data during an emergency at a commercial nuclear power plant whose 10-mile Emergency Planning Zone lies within the Commonwealth of Virginia.

II. Effective Date

This MOU is effective November 26, 2008.

III. Further Information

Documents related to this action, including the application for amendment and supporting documentation, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. From this site, you can access the NRC's Agencywide Documents Access and Management System (ADAMS), which provides text and image files of NRC's public documents. The ADAMS accession number for the document related to this notice is: Memorandum of Understanding Between NRC and the VA Department of Health ML 08337043. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) Reference staff at 1-800-397-4209, 301-415-4737 or by e-mail to pdr@nrc.gov.

These documents may also be viewed electronically on the public computers located at the NRC's Public Document Room (PDR), O 1 F21, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852. The PDR reproduction contractor will copy documents for a fee.

Dated at Rockville, Maryland this 8th day of January, 2009.

For the Nuclear Regulatory Commission.

William A. Gott,

Chief, Operations Branch, Division of Preparedness and Response, Office of Nuclear Security and Incident Response.

Memorandum of Understanding Pertaining to the Emergency Response Data System Between the U. S. Nuclear Regulatory Commission and the Virginia Department of Health**I. Authority**

The U.S. Nuclear Regulatory Commission (NRC) and the Virginia Department of Health (VDH), an agency of the Commonwealth of Virginia, enter into this Memorandum of Understanding (MOU) under the authority of section 274i of the Atomic Energy Act of 1954, as amended.

The Commonwealth of Virginia recognizes the Federal Government, primarily the NRC, as having the exclusive authority and responsibility to regulate the radiological and national security aspects of the construction and operation of nuclear production or utilization facilities, except for certain authority over air emissions granted to States by the Clean Air Act. Nothing in this MOU is intended to restrict or expand the scope of regulatory authority of either the NRC or the Commonwealth of Virginia.

In the Commonwealth of Virginia, the VDH, through its Division of Radiological Health and Safety Regulation (a division within VDH's Office of Epidemiology), is the state radiation control agency and implements the program regulating sources of radiation, not otherwise regulated by the NRC, for the protection of public health and safety. The Virginia Department of Emergency Management (VDEM) administers emergency services and disaster preparedness programs in the Commonwealth of Virginia.

II. Background

A. The Atomic Energy Act of 1954, as amended, and the Energy Reorganization Act of 1974, as amended, authorize the NRC to license and regulate, among other activities, the manufacture, construction, and operation of utilization facilities (nuclear power plants) in order to assure

common defense and security and to protect the public health and safety. Under these statutes, the NRC is the agency responsible for regulating nuclear power plant safety.

B. NRC believes that its mission to protect public health and safety can be served by a policy of cooperation with State governments and has formally adopted a policy statement on "Cooperation with States at Commercial Nuclear Power Plants and Other Nuclear Production or Utilization Facilities" (54 FR 7530, February 25, 1992). The policy statement provides that NRC will consider State proposals to enter into instruments of cooperation for certain programs when these programs have provisions to ensure close cooperation with NRC. This MOU is intended to be consistent with, and implement the provisions of, the NRC's policy statement.

C. NRC fulfills its statutory mandate to regulate nuclear power plant safety by, among other things, responding to emergencies at licensee facilities and monitoring the status and adequacy of licensees' responses to emergency situations.

D. The Commonwealth of Virginia fulfills, through the VDH and VDEM, its statutory mandate to provide for preparedness, response, mitigation, and recovery in the event of an accident at a nuclear power plant through its statutes located in Titles 32.1 and 44 of the Code of Virginia.

III. Scope

A. This MOU defines the way in which NRC and VDH intend to cooperate in planning and maintaining the capability to transfer reactor plant data via the Emergency Response Data System (ERDS) during emergencies at commercial nuclear power plants in the Commonwealth of Virginia that have implemented an ERDS interface, and for which any portion of the plant's 10-mile Emergency Planning Zone (EPZ) lies within the Commonwealth of Virginia.

B. It is understood by the NRC and the VDH that ERDS data will only be transmitted to the Commonwealth of Virginia during emergencies classified at the Alert level or above, during scheduled tests, or during exercises when available.

C. Nothing in this MOU is intended to restrict or expand the statutory authority of the NRC, the Commonwealth of Virginia, VDH, or VDEM, or to affect or otherwise alter the terms of any agreement in effect under the authority of section 274b of the Atomic Energy Act of 1954, as amended; nor is anything in this MOU intended to restrict or expand the authority of the

Commonwealth of Virginia, VDH, or VDEM, on matters not within the scope of this MOU.

D. Nothing in this MOU confers upon the Commonwealth of Virginia, VDH, or VDEM, the authority to (1) interpret or modify NRC regulations and NRC requirements imposed on the licensee; (2) take enforcement actions; (3) issue confirmatory letters; (4) amend, modify, or revoke a license issued by the NRC; or (5) direct or recommend nuclear power plant employees to take, or not take, any action. Authority for all such actions is reserved exclusively to the NRC.

E. This MOU does not confer any binding obligation or right of action on either party. This MOU does not obligate any funds and is subject to the availability of appropriated funds.

IV. NRC's General Responsibilities

Under this MOU, the NRC will maintain ERDS. ERDS is a system designed to receive, store, and retransmit data from in-plant data systems at nuclear power plants during emergencies. The NRC will provide the Commonwealth of Virginia, up to 10 digital certificates for use by designated personnel within the VDH and VDEM in accessing ERDS data during emergencies at nuclear power plants which have implemented an ERDS interface, and for which any portion of the plant's 10-mile EPZ lies within the Commonwealth of Virginia. The NRC reserves the right to revoke digital certificates at any time.

V. VDH General Responsibilities

A. VDH, through its lead radiological agency, will, in cooperation with the NRC, establish a capability to receive ERDS data. To this end, VDH will provide the necessary computer hardware and commercially licensed software required for ERDS data transfer to users.

B. VDH will provide the NRC with an initial, and periodically updated, list of designated persons serving as holders of ERDS digital certificates.

C. VDH will use ERDS only to access data, at the Alert level or higher, from nuclear power plants for which all or a portion of the 10-mile EPZ falls within the boundaries of the Commonwealth of Virginia.

D. For the purpose of minimizing the impact on plant operators, the Commonwealth of Virginia will seek clarification of ERDS data through the NRC.

VI. Implementation

A. VDH and the NRC agree to work in concert to assure that the following

communications and information exchange protocol regarding ERDS are followed:

a. VDH and the NRC agree in good faith to make available to each other information within the intent and scope of this MOU.

b. NRC and VDH agree to meet as necessary to exchange information on matters of common concern pertinent to this MOU. Unless otherwise agreed, such meetings will be held in the NRC Headquarters Operations Center. The affected utilities will be kept informed of pertinent information covered by this MOU.

c. To preclude the premature release of sensitive information, NRC will protect sensitive information to the extent permitted by the Freedom of Information Act, 5 U.S.C. 552, Title 10 of the Code of Federal Regulations, Part 2.790, and all other applicable authority. VDH and its Division of Radiological Health and Safety Regulation will protect sensitive information to the extent permitted by the Virginia Freedom of Information Act (Va-Code Ann. 2.2-3700 through 2.2-3715), and all other applicable authority.

d. NRC will conduct periodic tests of licensee ERDS data links. A copy of the test schedule will be provided to the VDH, through its Division of Radiological Health and Safety Regulation (Virginia's lead radiological agency) by the NRC. The VDH Division of Radiological Health and Safety Regulation may test its ability to access ERDS data during these scheduled tests, or may schedule independent tests of the State link with the NRC.

e. NRC will provide access to ERDS for emergency exercises with reactor units capable of transmitting exercise data to ERDS. For exercises in which the NRC is not participating, the VDH, through its Division of Radiological Health and Safety Regulation will coordinate with the NRC in advance to ensure ERDS availability. NRC reserves the right to preempt ERDS use for any exercise in progress in the event of an actual event at any licensed nuclear power plant.

VII. Contacts

A. The principal senior management contacts for this MOU will be Director, Division of Preparedness and Response, Office of Nuclear Security and Incident Response for the NRC, and the Director, Division of Radiological Health and Safety Regulation for the VDH. These individuals may designate appropriate staff representatives for the purpose of administering this MOU.

B. Identification of these contacts is not intended to restrict communication between NRC and VDH staff members, in particular those within the Division of Radiological Health and Safety Regulation, on technical and other day-to-day activities.

VIII. Resolution of Disagreements

A. If disagreements arise about matters within the scope of this MOU, NRC and the VDH will work together to resolve these differences.

B. Differences between the VDH and NRC staff over issues arising out of this MOU will, if they cannot be resolved in accordance with Section VIII.A, be resolved by the Director of the NRC Division of Preparedness and Response, Office of Nuclear Security and Incident Response.

C. Differences which cannot be resolved in accordance with Sections VIII.A and VIII.B will be reviewed and resolved by the NRC's Director, Office of Nuclear Security and Incident Response.

D. The NRC's General Counsel has the final authority to provide legal interpretation of the Commission's regulations.

IX. Effective Date

This MOU will take effect after it has been signed by both parties.

X. Duration

A formal review, not less than 1 year after the effective date, will be performed by the NRC to evaluate implementation of the MOU and resolve any problems identified. This MOU will be subject to periodic reviews and may be amended or modified upon written agreement by both parties, and may be terminated upon 30 days written notice by either party.

XI. Separability

If any provision(s) of this MOU or the application of any provision(s) to any person or circumstances is held invalid, the remainder of this MOU and the application of such provisions to other persons or circumstances will not be affected.

For the U.S. Nuclear Regulatory Commission.

Martin Virgilio for R. William Borchardt,
Executive Director for Operations.

For the Commonwealth of Virginia,
Virginia Department of Health.

Dated: July 9, 2008.

Dr. Carl Armstrong,
Director, Office of Epidemiology, Virginia Department of Health.
