SUPPLEMENTARY INFORMATION: The MBNMS Advisory Council was established in March 1994 to assure continued public participation in the management of the Sanctuary. Since its establishment, the Advisory Council has played a vital role in decisions affecting the Sanctuary along the central California coast.

The Advisory Council's twenty voting members represent a variety of local user groups, as well as the general public, plus seven local, state and

federal governmental jurisdictions. In addition, the respective managers or superintendents for the four California National Marine Sanctuaries (Channel Islands National Marine Sanctuary, Cordell Bank National Marine Sanctuary, Gulf of the Farallones National Marine Sanctuary and the Monterey Bay National Marine Sanctuary) and the Elkhorn Slough National Estuarine Research Reserve sit as non-voting members.

Four working groups support the Advisory Council: The Research Activity Panel ("RAP") chaired by the Research Representative, the Sanctuary Education Panel ("SEP") chaired by the Education Representative, the Conservation Working Group ("CWG") chaired by the Conservation Representative, and the Business and Tourism Activity Panel ("BTAP") chaired by the Business/Industry Representative, each dealing with matters concerning research, education, conservation and human use. The working groups are composed of experts from the appropriate fields of interest and meet monthly, or bi-monthly, serving as invaluable advisors to the Advisory Council and the Sanctuary Superintendent.

The Advisory Council represents the coordination link between the Sanctuary and the state and federal management agencies, user groups, researchers, educators, policy makers, and other various groups that help to focus efforts and attention on the central California coastal and marine ecosystems.

The Advisory Council functions in an advisory capacity to the Sanctuary Superintendent and is instrumental in helping develop policies, program goals, and identify education, outreach, research, long-term monitoring, resource protection, and revenue enhancement priorities. The Advisory Council works in concert with the Sanctuary Superintendent by keeping him or her informed about issues of concern throughout the Sanctuary, offering recommendations on specific issues, and aiding the Superintendent in achieving the goals of the Sanctuary program within the context of California's marine programs and policies.

FOR FURTHER INFORMATION CONTACT:

Malcolm Mohead or Jennifer Skidmore, (301)713-2289.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

Dr. Douglas Peterson, Warnell School of Forest Resources (Fisheries Division), University of Georgia, Athens, Georgia 30602, has requested a 5-year permit to maintain and conduct research on 95 hatchery-reared shortnose sturgeon at the University of Georgia to meet the following objectives: (1) quantify differences in the environmental tolerances of northern versus southern range shortnose sturgeon and (2) evaluate ontogenetic changes in the environmental tolerances of juvenile shortnose sturgeon. The fish would be obtained from the Warm Springs National Fish Hatchery and Regional Fisheries Center (USFWS), Warm Springs, Georgia 31830, under NMFS Permit 1604. Using a series of replicated laboratory (lethal and non-lethal) experiments, the researcher would evaluate the individual, additive, and interactive effects of the three habitat variables most critical in determining summer habitat quality for both juveniles and adult shortnose sturgeon: maximum water temperature, maximum salinity, and minimum concentration of dissolved oxygen. Researchers would also examine how environmental tolerances of shortnose sturgeon change with age and conditioning (chronic exposure). Future scientific research with these fish would involve studies of nutrition, tagging, physiology, environmental tolerance, contaminants, fish health, behavioral, tagging, genetics, and fish culture techniques. The permit would not authorize any takes from the wild, nor would it authorize any release of captive sturgeon into the wild.

Dated: October 2, 2009.

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.
