

351.310(c). Any hearing, if requested, will be held two days after the scheduled date for submission of rebuttal briefs. See 19 CFR 351.310(d).

The Department will issue the final results of the administrative and new shipper reviews, which will include the results of its analysis of issues raised in the briefs, within 120 days of publication of these preliminary results, in accordance with 19 CFR 351.213(h)(1) unless the time limit is extended.

Assessment Rates

The Department will determine, and CBP shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review. For assessment purposes, the Department calculated exporter/importer- (or customer-) specific assessment rates for merchandise subject to this review. Where appropriate, the Department calculated an *ad valorem* rate for each importer (or customer) by dividing the total dumping margins for reviewed sales to that party by the total entered values associated with those transactions. For duty-assessment rates calculated on this basis, the Department will direct CBP to assess the resulting *ad valorem* rate against the entered customs values for the subject merchandise. Where appropriate, the Department calculated a per-unit rate for each importer (or customer) by dividing the total dumping margins for reviewed sales to that party by the total sales quantity associated with those transactions. For duty-assessment rates calculated on this basis, the Department will direct CBP to assess the resulting per-unit rate against the entered quantity of the subject merchandise. Where an importer- (or customer-) specific assessment rate is *de minimis* (i.e., less than 0.50 percent), the Department will instruct CBP to assess that importer (or customer's) entries of subject merchandise without regard to antidumping duties. The Department intends to instruct CBP to liquidate entries containing subject merchandise exported by the PRC-wide entity at the PRC-wide rate we determine in the final results of this review. The Department intends to issue appropriate assessment instructions directly to CBP 15 days after publication of the final results of this review.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of these reviews for shipments of subject merchandise from the PRC entered, or

withdrawn from warehouse, for consumption on or after the publication date, as provided by sections 751(a)(1)(C) and (a)(2)(C) of the Act: (1) For all respondents receiving a separate rate, the cash deposit rate will be that established in the final results of these reviews; (2) for previously investigated or reviewed PRC and non-PRC exporters not listed above that have separate rates, the cash deposit rate will continue to be the exporter-specific rate published for the most recent period; (3) for all PRC exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be the PRC-wide rate of 216.01 percent; and (4) for all non-PRC exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the PRC exporters that supplied that non-PRC exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

The Department is issuing and publishing these preliminary results of administrative review and new shipper reviews in accordance with sections 751(a) and 777(i)(1) of the Act, and 19 CFR 351.221(b) and 351.214(h).

Dated: January 30, 2009.

Ronald K. Lorentzen,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XN06

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Application to renew scientific research permit.

SUMMARY: Notice is hereby given that NMFS has received one scientific research permit application request relating to Pacific salmon. The proposed research is intended to increase knowledge of species listed under the Endangered Species Act (ESA) and to help guide management and conservation efforts.

DATES: Comments or requests for a public hearing on the application must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5 p.m. Pacific standard time on March 11, 2009.

ADDRESSES: Written comments on the application should be sent to the Protected Resources Division, NMFS, 1201 NE Lloyd Blvd., Suite 1100, Portland, OR 97232-1274. Comments may also be sent via fax to 503-230-5441 or by e-mail to resapps.nwr@NOAA.gov.

FOR FURTHER INFORMATION CONTACT: Garth Griffin, Portland, OR (ph.: 503-231-2005, Fax: 503-230-5441, e-mail: Garth.Griffin@noaa.gov). Permit application instructions are available from the address above.

SUPPLEMENTARY INFORMATION:

Species Covered in This Notice

The following listed species are covered in this notice:

Chinook salmon (*Oncorhynchus tshawytscha*): threatened lower Columbia River (LCR), threatened upper Willamette River (UWR), endangered upper Columbia River (UCR), threatened Snake River (SR) spring/summer (spr/sum), threatened SR fall.

Chum salmon (*O. keta*): threatened Columbia River (CR).

Steelhead (*O. mykiss*): threatened LCR, threatened UWR, threatened middle Columbia River (MCR), threatened SR, endangered UCR, threatened PS.

Coho salmon (*O. kisutch*): threatened LCR, threatened Oregon Coast (OC), threatened Southern Oregon/Northern California coasts (SONCC).

Sockeye salmon (*O. nerka*): endangered SR.

Authority

Scientific research permits are issued in accordance with section 10(a)(1)(A) of the ESA (16 U.S.C. 1531 *et seq.*) and regulations governing listed fish and wildlife permits (50 CFR 222-226). NMFS issues permits based on findings that such permits: (1) are applied for in good faith; (2) if granted and exercised, would not operate to the disadvantage

of the listed species that are the subject of the permit; and (3) are consistent with the purposes and policy of section 2 of the ESA. The authority to take listed species is subject to conditions set forth in the permits.

Anyone requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). Such hearings are held at the discretion of the Assistant Administrator for Fisheries, NMFS.

Application Received

Permit 1410 – Renewal

The Northwest Fisheries Science Center (NWFSC) is seeking to renew permit 1410 for a period of five years. The original permit was in place for five years with three modifications; it expired on December 31, 2008. Under the new permit, the NWFSC would conduct research that would annually take adult and juvenile UCR Chinook, SR spr/sum Chinook, SR fall Chinook, LCR Chinook, UWR Chinook, SR sockeye, CR chum, LCR coho, OC coho, SONCC coho, UCR steelhead, SR steelhead, MCR steelhead, LCR steelhead, and UWR steelhead in the Columbia River plume and surrounding ocean environment. The purpose of the research is to: (a) determine the abundance, distribution, growth and condition of juvenile Columbia River salmonids in the plume and nearby ocean environment and characterize the area's physical and biological features as they relate to salmonid survival; (b) determine the impact that predators and food supply have on survival among juvenile Columbia River Chinook and coho salmon as they migrate through the Columbia River estuary and plume; and (c) synthesize the early ocean ecology of juvenile Columbia River salmonids, test mechanisms that control salmonid growth and survival, and produce ecological indices that forecast salmonid survival.

Ultimately the NWFSC would use simulation models and statistical analyses of climatic, oceanic, and other biological data and indices to help inform management decisions regarding the Columbia river and its salmonid populations. The research would benefit listed species by providing data that would help managers understand the linkages between salmonid abundance, distribution, growth, genetics, and health, and the effects of disease, parasites, diet, and predation in the estuarine and ocean environment. Ultimately, the data would help researchers and managers quantify the

effects of habitat restoration efforts and improve harvest and hatchery guidelines. In any case, the research would provide important information on salmonid life histories in the study area. The NWFSC proposes to capture the fish (using surface trawling), identify, sample, and release adult fish. The juvenile fish would be sacrificed to map disease presence and determine the effects that diet, parasites, genetics, etc. have on fish condition.

This notice is provided pursuant to section 10(c) of the ESA. NMFS will evaluate the application, associated documents, and comments submitted to determine whether the application meets the requirements of section 10(a) of the ESA and Federal regulations. The final permit decision will not be made until after the end of the 30-day comment period. NMFS will publish notice of its final action in the **Federal Register**.

Dated: February 3, 2009.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XN13

Marine Mammals; File No. 1039–1699

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application for amendment.

SUMMARY: Notice is hereby given that Ann Zoidis, Cetos Research Organization, 11 Des Isle Avenue, Bar Harbor, Maine 04609, has applied for an amendment to Scientific Research Permit No. 1039–1699–01.

DATES: Written, telefaxed, or e-mail comments must be received on or before March 11, 2009.

ADDRESSES: The application and related documents are available upon written request or by appointment in the following office(s):

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713-2289; fax (301)427-2521; and Pacific Islands Region, NMFS, 1601 Kapiolani Blvd., Rm 1110, Honolulu, HI

96814-4700; phone (808)944-2200; fax (808)973-2941.

Written comments or requests for a public hearing on this request should be submitted to the Chief, Permits, Conservation and Education Division, F/PR1, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular amendment request would be appropriate.

Comments may also be submitted by facsimile at (301)427-2521, provided the facsimile is confirmed by hard copy submitted by mail and postmarked no later than the closing date of the comment period.

Comments may also be submitted by e-mail. The mailbox address for providing e-mail comments is NMFS.Pr1Comments@noaa.gov. Include in the subject line of the e-mail comment the following document identifier: File No. 1039–1699.

FOR FURTHER INFORMATION CONTACT:

Carrie Hubbard or Kristy Beard, (301)713-2289.

SUPPLEMENTARY INFORMATION: The subject amendment to Permit No. 1039–1699, issued on June 30, 2004, is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

Permit No. 1039–1699–01 authorizes the permit holder to conduct humpback whale (*Megaptera novaeangliae*) research, including photo-identification, behavioral observations, and passive acoustics in the waters off Hawaii. Several species of non-listed, small whales and dolphins may also be studied. The permit holder is requesting an amendment to take up to 100 minke whales (*Balaenoptera acutorostrata*) in the waters off Hawaii annually. Minke whales would be approached for photo-identification. The purpose of the new research is to investigate the abundance, distribution, and behavior of this species, which has not been thoroughly studied in Hawaii. The amended permit would expire on June 30, 2009.

Concurrent with the publication of this notice in the Federal Register, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.
