Efficient and effective use of the C/ACAMS tools helps all State and local first responders and emergency managers nationwide reach their goal of making their communities safer. To ensure that interested stakeholders achieve this mission, C/ACAMS requests supporting information from users seeking to use its tool. The C/ACAMS Program Management Office evaluates the Functional Survey to determine levels of customers' satisfaction with the user experience with the C/ACAMS tool. The survey supports data-based decision making because it evaluates quantitative and qualitative data to identify improvements and identify significant issues based on experienced customer assessments of key tool functions. Obtaining current fact-based actionable data about tool features allows the program to appropriate funds cost-effectively based on user need, saving costs while improving the tool.
