Title: NSPS for Surface Coating of Plastic Parts for Business Machines

ICR Numbers: EPA ICR Number 1093.09, OMB Control Number 2060-0162.

ICR Status: This ICR is scheduled to expire on January 31, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The New Source Performance Standards (NSPS) for Surface Coating of Plastic Parts for Business Machines were promulgated on January 29, 1988. These standards apply to each spray booth that applies prime coats, color coats, texture coats or touch-up coats in industrial surface coating operations that apply coatings to plastic parts for use in the manufacture of business machines.

Affected sources are required to complete initial notifications, performance tests, and periodic reports. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NSPS.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 35 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information;

and transmit or otherwise disclose the information.

Respondents/Affected Entities: Business machine manufacturers.

Estimated Number of Respondents: 10.

Frequency of Response: Initially, quarterly, and semiannually.

Estimated Total Annual Hour Burden: 978.

Estimated Total Annual Cost: \$92,296 in labor costs and \$0 in capital/startup costs or operation and maintenance (O&M) costs.

Changes in the Estimates: There is a decrease estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease was due to a change in the adjustments to the estimates to correct a mathematical error.

Dated: December 24, 2009.

Richard T. Westlund,

Acting Director, Collection Strategies Division.
