SUPPLEMENTARY INFORMATION: Under Executive Order 13521, the President directed that the Commission shall be established within the Department of Health and Human Services (HHS). The charter was filed on March 10, 2010.

Objectives and Scope of Activities. The Commission shall advise the President on bioethical issues that may emerge as consequences of advances in biomedicine and related areas of science and technology. The Commission shall pursue its work with the goal of identifying and promoting policies and practices that ensure scientific research, healthcare delivery, and technological innovation are conducted in an ethically responsible manner. The Commission shall not be responsible for the review and approval of specific projects.
