

identified 23 projected reliability criteria violations, starting in 2012 and beyond, that the proposed project is designed to alleviate.

The Federal action under consideration in this EIS is the Applicant's proposal that the National Park Service grant the permits it has requested. The National Park Service's purpose in taking action is to respond to the Applicant's expressed need to expand its current right-of-way to construct new and taller power lines and add an additional 500kV power line, in light of the purposes and resources of the affected units of the National Park System, as expressed in statutes, regulations, and policies. Federal action is needed because the applicant has submitted the required applications and construction plan to replace and expand the existing line in accordance with 36 CFR Part 14 and applicable NPS Management Policies. The NPS therefore has a duty to consider whether, and with what conditions, if any, to issue the requested permits.

The NPS will analyze the proposed action and no action alternatives, as well as other possible alternatives including granting of the permits as requested, granting of the permits with stipulations, or denying the permits, and alternatives to the proposed line both within and outside the park. The NPS expects to identify additional alternatives, issues concerning the alternatives, and alternative mitigation strategies during the public scoping process.

This notice initiates the public participation and scoping process for the EIS. The public is invited to comment on the purpose, need, objectives, preliminary alternatives, or any other issues associated with the proposal. Information that details the purpose, need, and issues identified to date is available from the NPS Planning, Environment and Public Comment (PEPC) website at <http://parkplanning.nps.gov/dewa/>.

**Dates and Meeting Notices:** The public scoping period will commence on the date this notice is published in the **Federal Register** and last for at least 30 days. The NPS will hold public meetings near the parks and surrounding region to provide the public an opportunity to review the proposal and project information. All public meetings will be announced through local media, mailings, and the NPS PEPC Web site at <http://parkplanning.nps.gov/dewa/>. Comments will be accepted within 30 days after this publication date and/or

until at least 15 days after the last public scoping meeting.

**ADDRESSES:** Comments on issues, potential impacts, or suggestions for additional alternatives can be submitted using any one of the following methods. You may submit comments through the NPS PEPC Web site at <http://parkplanning.nps.gov/dewa/>, which is the preferred method. You may mail your comments to the National Park Service, Attention: DEWA PPL EIS Planning Team, Denver Service Center—Planning, P.O. Box 25287, Denver, CO 80225. Comments may also be submitted at any of the three public meetings to be announced.
