[Docket Nos. 50-272 and 50-311; NRC-2009-0390]

PSEG Nuclear, LLC, Salem Nuclear Generating Station, Units 1 and 2; Notice of Issuance of Renewed Facility Operating License Nos. DPR-70 and DPR-75 for an Additional 20-Year Period

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Renewed Facility Operating License Nos. DPR-70 and DPR-75 to PSEG Nuclear LLC (the licensee), the operator of the Salem Nuclear Generating Station, Units 1 and

2 (Salem). Renewed Facility Operating License Nos. DPR-70 and DPR-75 authorize the licensee to operate Salem at reactor core power levels not in excess of 3,459 megawatts thermal in accordance with the provisions of the Salem renewed license and its technical specifications.

The notice also serves as the record of decision for the renewal of Facility Operating License Nos. DPR-70 and DPR-75, consistent with Title 10 of the *Code of Federal Regulations* (10 CFR) 51.103, "Record of Decision—General." As discussed in the final supplemental environmental impact statement for Salem (NUREG-1437, Supplement 45, "Generic Environmental Impact Statement for License Renewal of Nuclear Plants, Supplement 45, Regarding Hope Creek Generating Station and Salem Nuclear Generating Station, Units 1 and 2, Final Report," issued March 2011), the Commission has considered a range of reasonable alternatives that included generation from coal-fired generation, natural gas combined-cycle generation, a combined alternative, and the no-action alternative. The factors considered in the record of decision can be found in the supplemental environmental impact statement for Salem.

Salem's units are pressurized-water reactors located in Lower Alloways Creek Township, Salem County, NJ. The application for the renewed license complied with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. As required by the Act and the Commission's regulations in 10 CFR Chapter I, "Nuclear Regulatory Commission," the Commission has made appropriate findings, which are set forth in the license. Prior public notice of the action involving the proposed issuance of the renewed license and of an opportunity for a hearing regarding the proposed issuance of the renewed license was published in the **Federal Register** on October 23, 2009 (74 FR 54854).

For further details with respect to this action, see (1) PSEG Nuclear LLC's license renewal application for Salem Nuclear Generating Station, Units 1 and 2, dated August 18, 2009, as supplemented by letters dated through May 18, 2011, (2) the Commission's safety evaluation report (NUREG-2101, "Safety Evaluation Report Related to the License Renewal of the Salem Nuclear Generating Station," issued June 2011), (3) the licensee's updated safety analysis report, and (4) the Commission's final environmental impact statement (NUREG-1437, Supplement 45), for Salem, published in March 2011. documents are available at the NRC's Public Document Room, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852, and are available online in the NRC Library at <http://www.nrc.gov/reading-rm.html>.

Copies of Renewed Facility Operating License Nos. DPR-70 and DPR-75 may be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Director, Division of License Renewal. Copies of the safety evaluation report for Salem (NUREG-2101) and the final environmental impact statement (NUREG-1437, Supplement 45) may be purchased from the National Technical Information Service, U.S. Department of Commerce, Springfield, VA 22161 (<http://www.ntis.gov>), 703-605-6000, or Attention: Superintendent of Documents, U.S. Government Printing Office, P.O. NUCLEAR REGULATORY COMMISSION

[Docket No. 50-225; NRC-2008-0277]

Rensselaer Polytechnic Institute Critical Experiments Facility; Notice of Issuance of Renewed Facility Operating License No. CX-22

The U.S. Nuclear Regulatory Commission (NRC, the Commission) has issued renewed Facility Operating License No. CX-22, held by the Rensselaer Polytechnic Institute (the licensee), which authorizes continued operation of the Rensselaer Polytechnic Institute Critical Experiments Facility (RCF), located in Schenectady, Schenectady County, New York. The RCF is a tank-type, light-water-moderated, critical facility licensed to operate at steady-state power levels up to and including 100 watts thermal power. The renewed Facility Operating License No. CX-22 will expire at midnight 20 years from its date of issuance.

The renewed facility operating license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the NRC's regulations in Title 10 of the *Code of Federal Regulations* (10 CFR), and sets forth those findings in the renewed facility operating license. The agency afforded an opportunity for hearing in the Notice of Opportunity for Hearing published in the **Federal Register** on May 15, 2008 (73 FR 28170). The NRC received no request for a hearing or petition for leave to intervene.

The NRC staff prepared a safety evaluation report for the renewal of Facility Operating License No. CX-22 and concluded, based on that evaluation, that the licensee can continue to operate the facility without undue risk to the health and safety of the public. The NRC staff also prepared an Environmental Assessment and Finding of No Significant Impact for license renewal, noticed in the **Federal Register** on June 14, 2011 (76 FR 34770), and concluded that renewal of the facility operating license will not have a significant impact on the quality of the human environment.

For details with respect to the application for renewal, see the licensee's letter dated November 19, 2002 (ML023380455 and ML072210835), as supplemented on July 21 (ML082060048), July 28 (ML082190523), and September 3, 2008 (ML101260200); June 28 (ML101820298), August 31 (ML102790045), October 14 (ML103070074), and October 28, 2010 (ML103080207); and February 14 (ML110490531) and May 9, 2011 (ML11131A180). Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff at 1-800-397-4209 or 301-415-4737, or send an e-mail to pdr.resource@nrc.gov.

Dated at Rockville, Maryland, this 27th day of June, 2011.
