An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: FY 2011 and FY 2013 Survey of Science and Engineering Research Facilities.

OMB Control Number: 3145–0101.

Type of Request: Intent to seek approval to reinstate an information collection for three years.

Proposed Project: The National Science Foundation Survey of Science and Engineering Research Facilities is a Congressionally mandated (Pub. L. 99–159), biennial survey that has been conducted since 1986. The survey collects data on the amount, condition, and costs of the physical facilities used to conduct science and engineering research. The survey also requests information on the networking and high performance computing capacity at the surveyed institutions, a critical part of the infrastructure for science and engineering research. Due to the rapidity of technological change, these questions are continually updated. It was expected by Congress that this survey would provide the data necessary to describe the status and needs of science and engineering research facilities and to formulate appropriate solutions to documented needs. During the FY 2007 and FY 2009 survey cycles, data were collected from a population of approximately 495 research-performing colleges and universities and approximately 163

nonprofit biomedical research institutions receiving research support from the National Institutes of Health.

Use of the Information: Analysis of the Facilities Survey data will provide updated information on the status of scientific and engineering research facilities and capabilities. The information can be used by Federal policy makers, planners, and budget analysts in making policy decisions, as well as by institutional academic officials, the scientific/engineering establishment, and state agencies and legislatures that fund universities.

Burden on the Public: The Facilities Survey will be sent by mail to approximately 495 higher education institutions. The completion time per academic institution is expected to average 41 hours. Assuming a 95% response rate, this would result in an estimated burden of 19,280 hours for academic institutions.

Dated: July 22, 2011.

Reports Clearance Officer, National Science Foundation.
