k. *Description of Application:* The licensee requests that the definition of "peak viewing times" in article 410 of the Twin Falls Project license be amended. This request would eliminate the requirement for aesthetic flows during the low-visitation season (September through March) and reduce the number of viewing hours during the high-visitation season (April through August). Currently, article 410 requires the licensee to maintain flows that average 300 cubic feet per second (cfs) over Twin Falls from 8 a.m. to 30 minutes after sunset each day, 7 days a week, April 1 through August 31, and 8 a.m. to 30 minutes after sunset on all Saturdays, Sundays and holidays, September 1 through March 31 (peak viewing times). At no time during these peak viewing times is the flow over Twin Falls to fall below 270 cfs or inflow, whichever is less, nor should flows average less than 300 cfs, or inflows less 200 cfs. The licensee is requesting that peak viewing times in article 410 be changed to require minimum flows over Twin Falls from 10 a.m. to 8 p.m., 7 days a week, April 1 through August 31 and no minimum flows the remainder of the year. No change in flow rates is requested.
