PLACE: Santa Fe Community Convention Center, 201 West Marcy Street, Santa Fe, New Mexico 87501. Parking will be available at no cost.

STATUS: Open. While the Government in the Sunshine Act does not require that the scheduled discussion be conducted in a meeting, the Board has determined that an open meeting in this specific case furthers the public interests underlying both the Sunshine Act and the Board's enabling legislation.

MATTERS TO BE CONSIDERED: In this public hearing and meeting, the Board wishes to further explore safety matters and gather other information related to public and worker health and safety for defense nuclear facilities at the Los Alamos National Laboratory (LANL). During Session I, the Board will examine the seismic safety of the Plutonium Facility. The Board will receive testimony on National Nuclear Security Administration (NNSA) actions to address Plutonium Facility seismic vulnerabilities that lead to severe postulated accident scenarios. The Board is also interested in the status of actions identified in NNSA's response to the Board's Recommendation 2009-2, *Los Alamos National Laboratory*

Plutonium Facility Seismic Safety, which was issued on October 26, 2009. The Board will also examine the status of emergency preparedness at the laboratory and will receive testimony concerning how well NNSA and its contractor are prepared to respond to site emergencies, including threats from natural phenomena. The Board is also interested in lessons learned from the events at the Fukushima Daiichi complex, the recent Las Conchas fire, and the 2000 Cerro Grande fire and the actions taken to incorporate these lessons learned at the site-wide level and in defense nuclear facility operations. During Session II, the Board will examine NNSA's efforts to mitigate risks to public and worker safety posed by existing aging defense nuclear facilities and NNSA's efforts to ensure the integration of safety-in-design for modern replacement facilities. The Board will receive testimony on the operations and safety basis at existing LANL defense nuclear facilities, including the Chemistry and Metallurgy Research Building, Area G in Technical Area-54, and the Radioactive Liquid Waste Treatment Facility. The Board will also receive testimony on the integration of safety-in-design for the Chemistry and Metallurgy Research Replacement project, the new Transuranic Waste Facility, and the Radioactive Liquid Waste Treatment Facility Upgrade project. The public hearing portion of this proceeding is authorized by 42 U.S.C. 2286b.
