SUPPLEMENTARY INFORMATION: The Draft EIS analyzes the potential impacts of issuing a lease for the Alton Coal Tract, serial number UTU 081895. An application to lease Federal coal near the Town of Alton, Utah, was filed with the BLM on November 12, 2004, by Alton Coal Development, LLC., in accordance with 43 CFR 3425.

The Alton Coal Tract includes 59.6 million tons of in-place bituminous coal. The coal quality in the Smirl coal zone on an "as received basis" is as follows: 10,019 Btu/lb (British Thermal Units per pound), 13 percent moisture, 10 percent ash, 39 percent volatile matter, 50 percent fixed carbon and 1.13 percent sulfur underlying the following lands in Kane County, Utah:

Salt Lake Meridian

Consistent with Federal regulations under NEPA and the Mineral Leasing Act of 1920, as amended, the BLM must prepare an environmental analysis prior to holding a competitive Federal coal lease sale. The Draft EIS analyzes and discloses to the public the direct, indirect, and cumulative environmental impacts of issuing a Federal coal lease on the Alton Coal Tract, including mining and transportation of coal to a railhead near Cedar City, Utah. A copy of the Draft EIS has been sent to affected Federal, State, tribal, and local government agencies; persons and entities identified as potentially being affected by a decision to lease the Federal coal in this tract; and persons who indicated to the BLM that they wished to receive a copy of the Draft EIS. The purpose of the public hearing is to solicit comments on the Draft EIS, for the proposed competitive lease sale of the Alton Coal Tract, and on the FMV and MER of the Federal coal.

The Draft EIS analyzes leasing the Alton Coal Tract as the Proposed Action. Under the Proposed Action, a competitive sale would be held and a lease issued for Federal coal in the tract. As part of the coal leasing process, the BLM is evaluating an additional alternative that would remove 394 acres and 6.8 million tons of Federal coal in the tract to minimize impacts in close proximity to the Town of Alton and preserve seasonal Greater sage-grouse habitat. The alternate tract configuration that the BLM is evaluating is described and analyzed as Alternative C in the Draft EIS. Under this alternative, a competitive sale would be held and a lease issued for Federal coal lands included in a tract modified by the BLM. The Draft EIS also analyzes the alternative of rejecting the application to lease Federal coal as the No Action Alternative. The Proposed Action and alternatives being considered in the Draft EIS are in conformance with the Kanab Field Office Record of Decision and Approved Resource Management Plan (2008).

Requests to be included on the mailing list for this project, for copies of the Draft EIS, or to be notified of the dates of the comment period and public hearing may be sent by mail, facsimile, or electronically to the addresses listed in the ADDRESSES section above. For those submitting comments on the Draft EIS, please make the comments as specific as possible with reference to page numbers and sections of the document. Comments that contain only opinions or preferences will not receive a formal response; however, they may be considered and included as part of the BLM decision-making process.

The public hearing is being held on the proposed lease sale to allow public comment on, and discussion of, the potential effects of the proposed lease sale and mining and transportation of the coal. The BLM must make determinations of the FMV of the coal in the tract(s) and whether MER of the coal in the tract can be accomplished. Proprietary data marked as confidential may be submitted to the BLM in response to FMV and MER in this solicitation of public comments. Data so marked shall be treated in accordance with the laws and regulations governing confidentiality of such information. A copy of the comments submitted by the public on FMV and MER, except those portions identified as proprietary by the author and meeting exemptions stated in the Freedom of Information Act, will be available for public inspection at the Bureau of Land Management, Utah State Office during regular business hours (7:45 a.m. to 4:30 p.m.), Monday through Friday, excluding Federal holidays. Comments on the FMV and MER should be sent to the BLM and should address, but not necessarily be limited to, the following information:

- 1. The quality of the coal resource;
- 2. The mining methods or methods which would achieve MER of the coal, including specifications of seams to be mined and the most desirable timing and rate of production;
- 3. Whether this tract is likely to be mined as part of an existing mine and therefore should be evaluated on a realistic incremental basis, in relation to the existing mine to which it has the greatest value;
- 4. Whether the tract should be evaluated as part of a potential larger mining unit and revaluated as a portion of a new potential mine (i.e., a tract which does not in itself form a logical mining unit);
- 5. Restrictions to mining that may affect coal recovery:
- The price that the mined coal would bring when sold;

- 7. Costs, including mining and reclamation, of producing the coal and the time of production;
- 8. The percentage rate at which anticipated income streams should be discounted, either with inflation or in the absence of inflation, in which case the anticipated rate of inflation should be given;
- 9. Depreciation, depletion, amortization, and other tax accounting factors;
- 10. The value of any surface estate where held privately;
- 11. Documented information on the terms and conditions of recent and similar coal land transactions in the lease sale area; and
- 12. Any comparable sales data of similar coal lands; and coal quantities and the FMV of the coal developed by the BLM may or may not change as a result of comments received from the public and changes in the market conditions between now and when final economic evaluations are completed.

Please note that comments and information submitted, including names, street addresses, and email addresses of respondents, will be available for public review and disclosure at the Kanab Field Office (address listed above) during regular business hours (7:45 a.m. to 4:30 p.m.), Monday through Friday, except holidays.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

State Director.
