

**Are there changes in the estimates from the last approval?**

There is no increase of the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This reflects EPA's and the SBEAP's desire to make useful data available to the public. The trend among government agencies is toward outcome measures; in the past the data collected through this ICR was of limited use in providing measures of this type. Therefore, the EPA, in consultation with representatives from the state programs, has decided that an increase in the hours would not provide improved data quality and usefulness.

**What is the next step in the process for this ICR?**

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

**BASINS and WEPP Climate Assessment Tools: Case Study Guide to Potential Applications**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of public comment period and letter peer-review.

**SUMMARY:** EPA is announcing a 30-day public comment period for the draft document titled, *BASINS and WEPP Climate Assessment Tools (CAT): Case Study Guide to Potential Applications* (EPA/600/R-11/123A). EPA also is announcing that an EPA contractor for external scientific peer review will select an independent group of experts to conduct a letter peer-review of the draft document. The document was

prepared by the National Center for Environmental Assessment within EPA's Office of Research and Development, and is intended to support application of two recently developed water modeling tools, the BASINS and WEPP climate assessment tools. The report presents a series of short case studies designed to illustrate the capabilities of these tools for conducting scenario based assessments of the potential future effects of climate, land use, and management change on water resources.

EPA intends to forward the public comments that are submitted in accordance with this notice to the external peer-reviewers for their consideration during the letter review. When finalizing the draft document, EPA intends to consider any public comments received in accordance with this notice. EPA is releasing this draft assessment for the purposes of public comment and peer review. This draft assessment is not final as described in EPA's information quality guidelines, and it does not represent and should not be construed to represent Agency policy or views.

The draft document is available via the Internet on the NCEA home page under the Recent Additions and the Data and Publications menus at <http://www.epa.gov/ncea>.

**DATES:** The 30-day public comment period begins November 17, 2011, and ends December 19, 2011. Technical comments should be in writing and must be received by EPA by December 19, 2011.

**SUPPLEMENTARY INFORMATION:****I. Information About the Project/Document**

There is growing concern about the potential effects of climate change on water resources. U.S. EPA and partners have developed two assessment tools, the BASINS Climate Assessment Tool (BASINS CAT) and the Water Erosion Prediction Project Climate Assessment Tool (WEPPCAT), that facilitate application of existing simulation models for conducting scenario-based assessments of potential climate change impacts on water.

This report presents a series of short case studies using the BASINS and WEPP climate assessment tools. The case studies are designed to illustrate the capabilities of these tools for conducting assessments of the potential future effects of climate, land use, and management change on water resources. Climate change scenarios are created based on model projections as well as historical data and past events. Land use change and management scenarios are also included to address questions related to the relative effects of land use versus climate change, and the effectiveness of management practices for reducing impacts.

This report is technical in nature. It is of interest to modeling professionals including water and watershed managers, urban or regional planners, government officials, and scientists and engineers interested in using the BASINS or WEPP water models to assess the potential implications of climate change on water resources.

**SUPPLEMENTARY INFORMATION:** The River Forest Dry Cleaners Superfund Site is located in River Forest, Cook County, Illinois. After EPA received an email from a concerned teacher, U.S. EPA conducted indoor air and sub-slab samples in facilities around the Site in November 2009, February 2010 and March 2010. The results did not indicate any level of contamination that warranted a removal action. The removal assessment was completed in March 2010.

U.S. EPA issued a Demand Letter to the Settling Party in September 2010. Between September 2010 and July 2011, EPA and the Settling Party negotiated the present proposed Administrative Settlement.
