Title: Pre-Manufacture Review Reporting and Exemption Requirements for New Chemical Substances and Significant New Use Reporting Requirements for Chemical Substances.

ICR Status: This is a request to renew an existing approved collection. This ICR is scheduled to expire on December 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information

while this submission is pending at OMB.

Abstract: Section 5 of the Toxic Substances Control Act (TSCA) requires manufacturers and importers of new chemical substances to submit to EPA notice of intent to manufacture or import a new chemical substance 90 days before manufacture or import begins. EPA reviews the information contained in the notice to evaluate the health and environmental effects of the new chemical substance. On the basis of the review, EPA may take further regulatory action under TSCA, if warranted. If EPA takes no action within 90 days, the submitter is free to manufacture or import the new chemical substance without restriction.

TSCA section 5 also authorizes EPA to issue Significant New Use Rules (SNURs). EPA uses this authority to take follow-up action on new or existing chemicals that may present an unreasonable risk to human health or the environment if used in a manner that may result in different and/or higher exposures of a chemical to humans or the environment. Once a use is determined to be a significant new use, persons must submit a notice to EPA 90 days before beginning manufacture, processing or importation of a chemical substance for that use. Such a notice allows EPA to receive and review information on such a use and, if necessary, regulate the use before it occurs.

Finally, TSCA section 5 also permits applications for exemption from section 5 review under certain circumstances. An applicant must provide information sufficient for EPA to make a determination that the circumstances in question qualify for an exemption. In granting an exemption, EPA may impose appropriate restrictions. This information collection addresses the reporting and recordkeeping requirements associated with TSCA section 5.

Responses to the collection of information are mandatory (see 40 CFR parts 700, 720, 721, 723 and 725). Respondents may claim all or part of a notice as CBI. EPA will disclose information that is covered by a CBI claim only to the extent permitted by, and in accordance with, the procedures in 40 CFR part 2.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register**, are listed in 40 CFR part 9 and included on the related

collection instrument or form, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to range between 0.725 hours and 508 hours per response, depending upon the type of response. Burden is defined in 5 CFR 1320.3(b).

Respondents/Affected Entities: Entities potentially affected by this action are manufacturers, processors or importers of chemical substances.

Frequency of Collection: On occasion.

Estimated Average Number of

Responses for Each Respondent: 4.8.

Estimated No. of Respondents: 443.

Estimated Total Annual Burden on Respondents: 117,162 hours.

Estimated Total Annual Costs: \$34,417,821.

Changes in Burden Estimates: This request reflects a decrease of 350 hours (from 117,512 hours to 117,162 hours) in the total estimated respondent burden from that currently in the OMB inventory. This decrease represents a re-estimate in the number of annual submissions to reflect EPA's experiences since the most recent ICR. The decrease in the number of annual submissions is largely associated with the finalization of the e-PMN rule in 2010. The change is an adjustment.

Dated: November 30, 2011.

John Moses,

Director, Collection Strategies Division.
