## DEPARTMENT OF JUSTICE

### Notice of Lodging of Consent Decree Under the Resource Conservation and Recovery Act

Notice is hereby given that on December 1, 2011, a proposed consent decree in *United States v. E.I. DuPont de Nemours and Company* ("DuPont"), Civil Action No. 1:11-7003, was lodged with the United States District Court for the District of New Jersey.

In this action the United States sought civil penalties and injunctive relief to address alleged violations of the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. 6901-92k, at DuPont's Secure Environmental Treatment Facility in Deepwater, New Jersey. The complaint alleges that DuPont returned hazardous waste to a facility not permitted to receive it, that DuPont failed to comply with an

information request from the U.S. Environmental Protection Agency, and that DuPont stored railcars containing hazardous waste without a permit and without secondary containment measures. The consent decree requires DuPont to pay a civil penalty of \$250,000 and, among other things, to store railcars containing hazardous waste accepted at the facility after March 30, 2012 only in accordance with the requirements of the RCRA, and to empty all railcars containing hazardous waste that were accepted prior to March 30, 2012 by June 1, 2012.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and either emailed to [pubcomment-ees.enrd@usdoj.gov](mailto:pubcomment-ees.enrd@usdoj.gov) or mailed to P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044-7611, and should refer to *United States v. DuPont*, D.J. Ref. 90-5-1-1-09300/1.

**SUPPLEMENTARY INFORMATION:** The Occupational Safety and Health Act allows covered employers to apply for four different types of variances from the requirements of OSHA standards. Employers submit variance applications that specify alternative means of complying with the requirements of applicable OSHA standards to the Agency. While use of the forms would be optional, employers are required to submit an application that includes all elements specified in regulations 29 CFR part 1905 in order to receive consideration for a variance.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is

generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6. For additional information, see the related notice published in the **Federal Register** on February 8, 2010 (75 FR 6220).

#### SUPPLEMENTARY INFORMATION:

##### I. Background

The National Longitudinal Survey of Youth 1979 (NLSY79) is a representative national sample of persons who were born in the years

1957 to 1964 and lived in the U.S. in 1978. These respondents were ages 14 to 22 when the first round of interviews began in 1979; they will be ages 47 to 56 when the planned twenty-fifth round of interviews is conducted in 2012 and 2013. The NLSY79 was conducted annually from 1979 to 1994 and has been conducted biennially since 1994. The longitudinal focus of this survey requires information to be collected from the same individuals over many years in order to trace their education, training, work experience, fertility, income, and program participation.

In addition to the main NLSY79, the biological children of female NLSY79 respondents have been surveyed since 1986. A battery of child cognitive, socio-emotional, and physiological assessments has been administered biennially since 1986 to NLSY79 mothers and their children. Starting in 1994, children who had reached age 15 by December 31 of the survey year (the Young Adults) were interviewed about their work experiences, training, schooling, health, fertility, self-esteem, and other topics. Funding for the NLSY79 Child and Young Adult surveys is provided by the Eunice Kennedy Shriver National Institute of Child Health and Human Development through an interagency agreement with the BLS and through a grant awarded to researchers at the Ohio State University Center for Human Resource Research (CHRR). The interagency agreement funds data collection for children and young adults up to age 20. The grant funds data collection for young adults age 21 and older. The BLS contracts with the National Opinion Research Center (NORC) at the University of Chicago to conduct the NLSY79 and associated Child and Young Adult surveys.

One of the goals of the Department of Labor (DOL) is to produce and disseminate timely, accurate, and relevant information about the U.S. labor force. The BLS contributes to this goal by gathering information about the labor force and labor market and disseminating it to policymakers and the public so that participants in those markets can make more informed, and thus more efficient, choices. Research based on the NLSY79 contributes to the formation of national policy in the areas of education, training, employment programs, and school-to-work transitions. In addition to the reports that the BLS produces based on data from the NLSY79, members of the academic community publish articles and reports based on NLSY79 data for the DOL and other funding agencies. To date, more than 1,800 articles examining
