II. Discussion

The application for renewal, dated December 15, 2011, was submitted pursuant to Title 10 of the Code of Federal Regulations (10 CFR) part 54, which included an environmental report (ER). A separate notice of receipt and availability of the application was published in the **Federal Register** on January 3, 2012 (77 FRN 142). A notice of acceptance for docketing of the application and opportunity for hearing regarding renewal of the facility operating license is also being published in the **Federal Register**. The purpose of this notice is to inform the public that the NRC will be preparing an environmental impact statement (EIS) related to the review of the license renewal application and to provide the public an opportunity to participate in the environmental scoping process, as defined in 10 CFR 51.29.

As outlined in 36 CFR 800.8, "Coordination with the National Environmental Policy Act," the NRC plans to coordinate compliance with Section 106 of the National Historic Preservation Act (NHPA) in meeting the requirements of the National Environmental Policy Act of 1969 (NEPA). Pursuant to 36 CFR 800.8(c), the NRC intends to use its process and documentation for the preparation of the EIS on the proposed action to comply with Section 106 of the NHPA, in lieu of the procedures set forth at 36 CFR 800.3 through 800.6.

In accordance with 10 CFR 51.53(c) and 10 CFR 54.23, Ameren submitted the ER as part of the application. The ER was prepared pursuant to 10 CFR Part 51 and is publicly available in ADAMS under Accession No. ML113530374. The ER may also be viewed on the Internet at <http://www.nrc.gov/reactors/operating/licensing/renewal/applications/callaway.html>. In addition, the ER is available to the public near the site at the Callaway County Public Library, 710 Court Street, Fulton, MO 65251.

This document advises the public that the NRC intends to gather the information necessary to prepare a plant-specific supplement to the NRC's "Generic Environmental Impact Statement (GEIS) for License Renewal of Nuclear Plants" (NUREG-1437), related to the review of the application for renewal of the Callaway operating license for an additional 20 years.

Possible alternatives to the proposed action (license renewal) include no action and reasonable alternative energy sources. The NRC is required by 10 CFR 51.95 to prepare a supplement to the GEIS in connection with the renewal of an operating license. This document is being published in accordance with NEPA and the NRC's regulations found in 10 CFR Part 51.

The NRC will first conduct a scoping process for the supplement to the GEIS and, as soon as practicable thereafter, will prepare a draft supplement to the GEIS for public comment. Participation in the scoping process by members of the public and local, State, Tribal, and Federal government agencies is encouraged. The scoping process for the supplement to the GEIS will be used to accomplish the following:

- a. Define the proposed action, which is to be the subject of the supplement to the GEIS;

- b. Determine the scope of the supplement to the GEIS and identify the significant issues to be analyzed in depth;

- c. Identify and eliminate from detailed study those issues that are peripheral or that are not significant;

- d. Identify any environmental assessments and other EISs that are being or will be prepared that are related to, but are not part of, the scope of the supplement to the GEIS being considered;

- e. Identify other environmental review and consultation requirements related to the proposed action;

- f. Indicate the relationship between the timing of the preparation of the environmental analyses and the Commission's tentative planning and decision-making schedule;

- g. Identify any cooperating agencies and, as appropriate, allocate assignments for preparation and schedules for completing the supplement to the GEIS to the NRC and any cooperating agencies; and

- h. Describe how the supplement to the GEIS will be prepared and include any contractor assistance to be used.

The NRC invites the following entities to participate in scoping:

- a. The applicant, Ameren;
- b. Any Federal agency that has jurisdiction by law or special expertise

with respect to any environmental impact involved or that is authorized to develop and enforce relevant environmental standards;

c. Affected State and local government agencies, including those authorized to develop and enforce relevant environmental standards;

d. Any affected Indian tribe;

e. Any person who requests or has requested an opportunity to participate in the scoping process; and

f. Any person who has petitioned or intends to petition for leave to intervene.

III. Public Scoping Meeting

In accordance with 10 CFR 51.26, the scoping process for an EIS may include a public scoping meeting to help identify significant issues related to a proposed activity and to determine the scope of issues to be addressed in an EIS. The NRC has decided to hold public meetings for the Callaway license renewal supplement to the GEIS. The scoping meetings will be held on March 14, 2012, and there will be two sessions to accommodate interested parties. The first session will convene at 2 p.m. and will continue until 4 p.m., as necessary. The second session will convene at 7:00 p.m. with a repeat of the overview portions of the meeting and will continue until 9:00 p.m., as necessary. Both sessions will be held at the Fulton City Hall, 18 East 4th Street, Fulton, MO 65251.

Both meetings will be transcribed and will include: (1) An overview by the NRC staff of the NEPA environmental review process, the proposed scope of the supplement to the GEIS, and the proposed review schedule; and (2) the opportunity for interested government agencies, organizations, and individuals to submit comments or suggestions on the environmental issues or the proposed scope of the supplement to the GEIS. Additionally, the NRC staff will host informal discussions one hour prior to the start of each session at the same location. No formal comments on the proposed scope of the supplement to the GEIS will be accepted during the informal discussions. To be considered, comments must be provided either at the transcribed public meetings or by any method provided in the **ADDRESSES** section of this document.

Persons may register to attend or present oral comments at the meetings on the scope of the NEPA review by contacting the NRC Project Manager, Ms. Carmen Fells, by telephone at 301-415-6337, or by email at Carmen.Fells@nrc.gov no later than March 7, 2012. Members of the public may also register to speak at the meeting

within 15 minutes of the start of each session. Individual oral comments may be limited by the time available, depending on the number of persons who register. Members of the public who have not registered may also have an opportunity to speak if time permits. Public comments will be considered in the scoping process for the supplement to the GEIS. Ms. Fells will need to be contacted no later than March 5, 2012, if special equipment or accommodations are needed to attend or present information at the public meeting so that the NRC staff can determine whether the request can be accommodated.

Participation in the scoping process for the supplement to the GEIS does not entitle participants to become parties to the proceeding to which the supplement to the GEIS relates. Matters related to participation in any hearing are outside the scope of matters to be discussed at this public meeting. The notice of acceptance for docketing of the application and opportunity for hearing that was published in the **Federal Register** describes the hearing process.

Dated at Rockville, Maryland, this 14th day of February, 2012.

For the Nuclear Regulatory Commission.

Chief, Projects Branch 2, Division of License Renewal, Office of Nuclear Reactor Regulation.

SUPPLEMENTARY INFORMATION:

I. Discussion

Union Electric Company submitted the application dated December 15, 2011, pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) part 54, to renew operating license NPF-30. A notice of receipt and availability of the license renewal application (LRA) was published in the **Federal Register** on January 3, 2012 (77 FRN 142).

The Commission's staff has determined that Union Electric Company has submitted sufficient information in accordance with 10 CFR 54.19, 54.21, 54.22, 54.23, and 51.53(c), to enable the staff to undertake a review of the application, and that the application is therefore acceptable for docketing. The current Docket Number, 50-483, for operating license NPF-30 will be retained. The determination to accept the LRA for docketing does not constitute a determination that a renewed license should be issued, and does not preclude the NRC staff from requesting additional information as the review proceeds.
