For assistance, please contact FERC Online Support. Although the Commission strongly encourages electronic filing, documents may also be paper-filed. To paper-file, mail an original and seven copies to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. Description of Application: Alabama Power Company seeks approval to replace turbine units 1 and 4 at the Lay Development, and turbine unit 2 at the Bouldin Development of the Coosa River Project. Specifically, at the Lay Development the licensee proposes to complete turbine refurbishment of the two turbines, stator coil replacement, wicket gate system rehabilitation, greaseless gate stem bushings installation, turbine and generator bearing refurbishment, and related component upgrades. For the Bouldin Development, the licensee proposes complete turbine refurbishment, stator coil replacement, wicket gate system rehabilitation or replacement, greaseless gate stem bushings installation, turbine and generator bearing refurbishment, and related component upgrades. The turbine unit modifications are expected to increase the turbine rating for each unit by approximately 4 megawatts (MW), as well as increase efficiency and annual generation. However, since the units are generator-limited, the installed capacity at the Lay and Bouldin developments will not change. The unit replacements at the Lay Development would provide approximately 13.6 percent increase in energy output, and the current full gate flow of 5,770 cubic feet per second (cfs) is expected to remain the same, plus or minus 15 percent. The unit replacement at the Bouldin Development would provide approximately 5 percent increase in energy output, and the current full gate flow of 9,600 cfs is expected to remain the same, plus or minus 15 percent.

l. A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

Any filings must bear in all capital letters the title "COMMENTS," "PROTEST," or "MOTION TO INTERVENE," as applicable, and the Project Number of the particular application to which the filing refers. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.
