Title: NSPS for Other Solid Waste Incineration Units (Renewal).

ICR Numbers: EPA ICR Number 2163.04, OMB Control Number 2060-0563.

ICR Status: This ICR is scheduled to expire on May 31, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A, and any changes, or additions to the General Provisions specified at 40 CFR part 60, subpart EEEE.

Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 60, subpart EEEE, as

authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

In order to ensure compliance with these standards, adequate reporting and recordkeeping are necessary. In the absence of such information, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are list in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average zero hour per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose and provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and operators of other solid waste incineration units.

Estimated Number of Respondents: 0.

Frequency of Response: Initially, annually and semiannually.

Estimated Total Annual Hour Burden: 0.

Estimated Total Annual Cost: \$0.

Changes in the Estimates: There are no changes in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. At present, there are no OSWI units subject to the regulations, and no new units are expected to be constructed or operated over the next three years. It is assumed that potential respondents would use alternative methods of waste disposal that are more economical, e.g. landfills, rather than replacing existing OSWI units. As a result, no respondent or

agency burdens or costs have been estimated, and no annual is burden expected.

John Moses,

Director, Collection Strategies Division.
