SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act (44 U.S.C. 3501-3521) and OMB regulations at 5 CFR part 1320 provide that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond. In order to obtain and renew an OMB control number, Federal agencies are required to seek public comment on information collection and recordkeeping activities.

As required at 5 CFR 1320.8(d), the BLM published a 60-day notice in the **Federal Register** on February 22, 2012 (77 FR 10554), and the comment period ended April 23, 2012. The BLM received no comments. The BLM now requests comments on the following subjects:

1. Whether the collection of information is necessary for the proper functioning of the BLM, including whether the information will have practical utility;
2. The accuracy of the BLM's estimate of the burden of collecting the information, including the validity of the methodology and assumptions used;
3. The quality, utility and clarity of the information to be collected; and
4. How to minimize the information collection burden on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other forms of information technology.

Please send comments as directed under **ADDRESSES** and **DATES**. Please refer to OMB control number 1004-0004 in your correspondence. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that

your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact the above individuals during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question for the above individuals. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The lead Federal agency for the Mohave County Wind Farm Project is the BLM Kingman Field Office. Cooperating agencies are the Western Area Power Administration (Western); Bureau of Reclamation—Lower Colorado Region (Reclamation); National Park Service—Lake Mead National Recreation Area; Mohave County, Arizona; Arizona Game and Fish Department; and the Hualapai Tribe Department of Cultural Resources.

The applicant, BP Wind Energy North America (BPWE), applied for a right-of-way to construct, operate, maintain, and decommission a 500-megawatt (MW) wind farm, including turbine generators and associated infrastructure, on approximately 38,099 acres of land managed by the BLM and approximately 8,960 acres of land managed by Reclamation, totaling approximately 47,059 acres of Federal land. The project area is located in the White Hills area approximately 40 miles northwest of Kingman, Arizona, approximately 9 miles south of the Colorado River, and approximately 20 miles southeast of Hoover Dam. A map of the proposed project area and a legal description are available on the BLM Web site at <http://www.blm.gov/az/st/en/prog/energy/wind/mohave.html>. The project is anticipated to generate up to 500 MW of electricity. It is proposed to consist of up to 283 turbines, access roads, and ancillary facilities. The turbine generators would be selected from those with a power output ranging from 1.5 to 3.0 MW each. To the extent possible, existing roads would be used to reduce potential impacts associated with the construction of new roads. Roads would be improved as needed, and the road network would be supplemented with internal access/service roads to each wind turbine.

Proposed ancillary facilities include pad-mounted transformers, an underground 34.5-kilovolt (kV) electrical collection system between the turbines, distribution connector lines (either underground or above-ground) tying the turbine strings to either a 345-
