

Security Management Directive 023–01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. A preliminary environmental analysis checklist supporting this determination is available in the docket where indicated under **ADDRESSES**. This proposed rule involves implementation of regulations at 33 CFR part 165 that establish safety zones on navigable waters of the United States for fireworks events. These safety zones are enforced for the duration of fireworks display events. The fireworks are launched from or immediately adjacent to navigable waters of the United States and may have potential for negative impact on the safety or

other interest of waterway users and near shore activities in the event area. The category of activities includes fireworks launched from barges at or near the shoreline that generally rely on the use of navigable waters as a safety buffer.

This proposed rule is categorically excluded, under figure 2–1, paragraph (34)(g), of this instruction. This rule establishes a temporary safety zone to protect the public from fireworks fallouts and premature detonations. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

SUMMARY: EPA proposed on April 25, 2012 (77 FR 24794) to take action on a revision to the state implementation

SUPPLEMENTARY INFORMATION: In two submissions dated April 16, 2012, New York State Department of Environmental Conservation submitted two SIP revision requests. The first SIP revision requests that EPA include in New York's Regional Haze SIP the New York State legislation regulating the sulfur content of fuel oil, Bill Number S1145C, which amends the New York Environmental Conservation Law to include a new section 19–0325.

The second SIP revision requests that EPA take action on proposed SIP revisions from New York in parallel with the State's processing of the following draft Title V permits that the State intends to submit as SIP revisions to meet the BART requirement: Bowline Point Generating Station, Danskammer Generating Station, Kodak Operations at Eastman Business Park, Oswego Harbor Power Owens Corning Delmar Plant, and Syracuse Energy Corporation.

New York also requested processing of the following adopted Title V permits implementing BART for the following facilities: 59th Street Station [Con Ed], ALCOA Massena Operations (West Plant), Arthur Kill Generating Station [NRG], EF Barrett Power Station (NG), Holcim (US) Inc–Catskill Plant, International Paper Ticonderoga Mill, Lafarge Building Materials, Lehigh

Northeast Cement Northport Power Station (NG), Ravenswood Generating Station [TC], Ravenswood Steam Plant [Con Edison], Roseton Generating Station [Dynegy], and Samuel A Carlson Generating Station [Jamestown Board of Public Utilities (BPU)].

These materials have been placed in the docket for our proposed action on the New York regional haze SIP submission, Docket ID No. EPA–R02–OAR–2012–0296.

EPA was aware that New York State intended to submit additional information relevant to the action EPA was proposing on New York's Regional Haze SIP. EPA, therefore, discussed in its proposal the possible actions EPA would take should this information be timely submitted. EPA included in the record the draft information that New York was in the process of finalizing and submitting as part of its SIP revision. EPA evaluated this draft information as part of the Agency's proposed action on New York's Regional Haze SIP.

EPA is notifying interested parties that EPA's final action will be based on the proposed rulemaking, the additional information identified in this notice of data availability, and an assessment of any public comments that may be received.

Portions of this SIP revision are being proposed under a procedure called parallel processing, whereby EPA proposes rulemaking action concurrently with the state's procedures for amending its regulations. If the proposed revision is substantially changed in areas other than those identified in the proposal, EPA will evaluate those changes and may publish another notice of proposed rulemaking. If no substantial changes are made other than those areas cited in the proposal, EPA will publish a final rulemaking on the revisions.
