

are expanded, but with differing management approaches.

Alternative B: Increased Research and Management via Partnerships

Alternative B proposes increased research and management capability, primarily through the use of cooperative partnerships and outside funding, with a modest increase of staff (three positions for the Complex). Research would be enhanced beyond priority, high-profile imperiled species. Because much baseline data are needed beyond the current surveying and monitoring protocols, this alternative would seek to initiate studies of a broader suite of species and to document noted declines of refuge habitat and species (waterfowl) and climate-change impacts. Since the refuge is accessible mostly by water from off-site, non-Service-owned ramps, we would provide more complete information to help the public locate the refuge via water. Studies would be conducted to assess visitor and commercial use effects on refuge resources; further, in Citrus County, commercial uses would require a special use permit issued by the refuge. A volunteer coordinator position is proposed to expand the volunteer corps and programs and to train and use volunteers to promote interpretation, voluntary compliance with refuge regulations, and the new environmental education programs of the refuge.

Alternative C: Adaptive Management (Proposed Alternative)

Alternative C would also heavily rely on our extensive partnerships and promote some new ones. We would rely on and use a volunteer corps for every program area and investigate the use of prison crews for maintenance work. This alternative assumes Service funding above current levels for research studies and facilities development and proposes additional staffing (eight positions for the Complex), to provide optimal resource protection and management capability. Research would include a broader suite of species, as well as habitat studies to adaptively manage for wildlife populations. The impacts of commercial and visitor use and external threats to the refuge would be studied and the results of those studies applied to refuge management and public use. Upland uses would be promoted though the development of improved facilities and access, and an observation platform and kayak landing would be added to the Dog Island facility, accessed by boat. The addition of key positions, such as a law enforcement officer, a volunteer coordinator, and biological and

computer-mapping technicians, would allow for greater resource study, mapping, data analysis, and enforcement. The hiring of a wildlife refuge specialist and office assistant would support staff and provide a dedicated outreach coordinator. Refuge facilities would be improved for both visitor services and personnel, including projects to replace the headquarters office (to reduce flooding potential) and build a pole barn and make other smaller improvements to the maintenance area and shop. For all alternatives, "green" options, materials, and energy efficiency would be included in the design and construction of new facilities and in equipment replacement.

SUPPLEMENTARY INFORMATION:

I. Abstract

Each tribally-controlled college or university requesting financial assistance under the Tribally Controlled Colleges and Universities Assistance Act of 1978, as amended, 25 U.S.C. 1801 et seq. (Act) is required by 25 U.S.C. 1807(a) and 25 CFR 41.8 to provide information for the purpose of securing a grant. Similarly, each tribally-controlled college or university that receives financial assistance under the Act is required by 25 U.S.C. 1808(c)(1) and 25 CFR 41.9 to provide a report on the use of funds received.

II. Request for Comments

The BIA requests your comments on these collections concerning: (a) The necessity of this information collection for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) The accuracy of the agency's estimate of the burden (hours and cost) of the collection of information, including the validity of the methodology and assumptions used; (c) Ways we could enhance the quality, utility, and clarity of the information to be collected; and (d) Ways we could minimize the burden of the collection of the information on the respondents, such as through the use of automated collection techniques or other forms of information technology.

Please note that an agency may not conduct or sponsor, and an individual need not respond to, a collection of information unless it has a valid OMB Control Number.

It is our policy to make all comments available to the public for review at the location listed in the **ADDRESSES** section. Before including your address, phone number, email address or other personally identifiable information, be

advised that your entire comment—including your personally identifiable information—may be made public at any time. While you may request that we withhold your personally identifiable information, we cannot guarantee that we will be able to do so.
