SUPPLEMENTARY INFORMATION:

Species Covered in This Notice

Chinook salmon (*Oncorhynchus tshawytscha*): threatened, naturally produced and artificially propagated Snake River spring/summer.

Chinook salmon (*O. tshawytscha*): threatened, naturally produced and artificially propagated Snake River fall-run.

Steelhead (*O. mykiss*): threatened, naturally produced and artificially propagated Snake River basin.

Sockeye (*O. nerka*): endangered, naturally produced and artificially propagated Snake River.

The Shoshone-Bannock Tribes have submitted to NMFS a Tribal Plan describing the management of ceremonial and subsistence fisheries in the Salmon River basin in the State of Idaho. The objective of the Tribal Plan is to harvest spring Chinook salmon in a manner that does not appreciably reduce the likelihood of survival and recovery of the ESU. Impact levels on the listed spring Chinook salmon populations in the ESU are specified by a sliding-scale harvest rate schedule based on run size and escapement needs as described in the Tribal Plan. The Tribal Plan sets maximum harvest rates for each management unit or population based on its status, and assures that those rates or objectives are not exceeded. A variety of monitoring and evaluation tasks to be conducted by the Shoshone-Bannock Tribes is specified in the Tribal Plan to assess the abundance of spring Chinook salmon and to determine fishery effort and catch. A comprehensive review of the fisheries and ESA-listed salmon and steelhead populations are performing as expected will be done within the proposed fishery season and at the end of the proposed season.

As required by the ESA 4(d) rule for Tribal Plans (65 FR 42481, July 10, 2000), the Secretary is seeking public

comment on his pending determination as to whether the Tribal Plan for fisheries in the Salmon River of Idaho by the Shoshone-Bannock Tribes would appreciably reduce the likelihood of survival and recovery of the ESA-listed Snake River salmon and steelhead.

Under section 4(d) of the ESA, the Secretary is required to adopt such regulations as he deems necessary and advisable for the conservation of species listed as threatened. NMFS has issued a final ESA 4(d) Rule for Tribal Plans adopting regulations necessary and advisable to harmonize statutory conservation requirements with tribal rights and the Federal trust responsibility to tribes (50 CFR 223.209).

This 4(d) Rule for Tribal Plans applies the prohibitions enumerated in section 9(a)(1) of the ESA. NMFS did not find it necessary and advisable to apply the take prohibitions described in section 9(a)(1)(B) and 9(a)(1)(C) to fishery harvest activities if the fisheries are managed in accordance with a Tribal Plan whose implementation has been determined by the Secretary to not appreciably reduce the likelihood of survival and recovery of the listed salmonids. As specified in the Tribal 4(d) Rule, before the Secretary makes a decision on the Tribal Plan, the public must have an opportunity to review and comment on the pending determination.

Authority

Under section 4 of the ESA, the Secretary is required to adopt such regulations as he deems necessary and advisable for the conservation of the species listed as threatened. The ESA Tribal 4(d) Rule (50 CFR 223.209) states that the ESA section 9 take prohibitions will not apply to Tribal Plans that will not appreciably reduce the likelihood of survival and recovery for the listed species.

SUPPLEMENTARY INFORMATION:

On December 20, 2011, notice was published in the **Federal Register** (76 FR 78890) that a request for a permit to conduct cetacean research had been submitted by the above-named applicant. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

Permit No. 15240 authorizes the PIFSC to take 20 cetacean species, including six species listed as endangered [blue (*Balaenoptera musculus*), fin (*B. physalus*), sei (*B. borealis*), humpback (*Megaptera novaeangliae*), sperm (*Physeter macrocephalus*), and North Pacific right (*Eubalaena japonica*) whales] and one stock proposed to be listed as endangered, Hawaiian insular false killer whales (*Pseudorca crassidens*). Endangered Hawaiian monk seals [*Monachus schauinslandi*] may be harassed incidental to the cetacean research. The purpose of the research is to determine the abundance, distribution, stock structure, movement patterns, and ecological relationships of cetaceans occurring in U.S. and international waters of the Pacific Islands Region. The action area includes Hawaii, Palmyra, American Samoa,

Guam, the Commonwealth of the Northern Mariana Islands, Johnston Atoll, Kingman Reef, Howland Island, Baker Island, Jarvis Island, and Wake Island. Research methodologies include aerial and vessel surveys, behavioral observations, photo-identification, acoustic recordings, biopsy collection, and dart and suction cup tagging. Salvage and import/export of cetacean parts, specimens, and biological samples may also occur. The permit is valid through May 31, 2017.

An environmental assessment (EA) was prepared analyzing the effects of the permitted activities on the human environment in compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*). Based on the analyses in the EA, NMFS determined that issuance of the permit would not significantly impact the quality of the human environment and that preparation of an environmental impact statement was not required. That determination is documented in a Finding of No Significant Impact (FONSI), signed on May 15, 2012.

As required by the ESA, issuance of this permit was based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: May 23, 2012.

Tammy C. Adams,

Acting Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

Comments

A 60-day public comment Notice was published in the **Federal Register** on November 25, 2011. This comment period ended January 24, 2012. One public comment was received from this Notice, submitted by the Washington Commission for National & Community Service ("Commission"). The Commission recommended removing "active duty" from the survey question about veteran status, and CNCS removed "active duty" from the survey. The Commission questioned whether it was necessary to collect respondents' income and household size data. CNCS omitted these questions from the survey. The Commission recommended adding "transfer of the Siegel Education Award

to a family member" as a possible motivation for Senior Corps volunteers to serve. CNCS added this to the survey. The Commission suggested clarifying the term "supervisor/team leader" in the survey. CNCS program offices provided accurate wording for supervisors and team leaders, and these were added to the survey.

Description: The Corporation is seeking approval of the Understanding the Value of Service in Participants' Experience survey, which is used by participants in and recent alumni of AmeriCorps and Senior Corps to describe their satisfaction with involvement in CNCS-supported service initiatives. CNCS wishes to understand participants' perspectives on the entry process, the service experience, and the impact of serving. The information will be used to better understand participants' satisfaction with CNCS programs and how various aspects of the service experience relate to participant satisfaction.
