SUPPLEMENTARY INFORMATION:

OMB Approval No. 2138-0018

Title: Report of Passengers Denied Confirmed Space.

Form No.: BTS Form 251.

Type of Review: Re-instatement of an expired collection.

Respondents: Large certificated air carriers.

Number of Respondents: 14.

Number of Responses: 56.

Total Annual Burden: 560 hours.

Needs and Uses: BTS Form 251 is a one-page report on the number of passengers denied seats either voluntarily or involuntarily, whether these bumped passengers were provided alternate transportation and/or compensation, and the amount of the payment. U.S. air carriers that account for at least 1 percent of domestic scheduled passenger service must report all operations with 30 seat or larger aircraft that depart a U.S. airport.

Carriers do not report data from inbound international flights because the protections of 14 CFR part 250 *Oversales* do not apply to these flights. The report allows the Department to monitor the effectiveness of its oversales rule and take enforcement action when necessary. The involuntarily denied-boarding rate has decreased from 4.38

per 10,000 passengers in 1980 to 0.71 for the quarter ended December 2011. The publishing of the carriers' individual denied boarding rates has negated the need for more intrusive regulation. The rate of denied boarding can be examined as a continuing fitness factor. This rate provides an insight into a carrier's customer service practices. A rapid sustained increase in the rate of denied boarding may indicate operational difficulties. Because the rate of denied boarding is released quarterly, travelers and travel agents can select carriers with lower incidences of bumping passengers. This information is available in the *Air Travel Consumer Report* at: <http://airconsumer.ost.dot.gov/reports/index.htm>. The *Air Travel Consumer Report* is also sent to newspapers, magazines, and trade journals. Without Form 251, determining the effectiveness of the Department's oversales rule would be impossible.

The Confidential Information Protection and Statistical Efficiency Act of 2002 (44 U.S.C. 3501 note), requires a statistical agency to clearly identify information it collects for non-statistical purposes. BTS hereby notifies the respondents and the public that BTS uses the information it collects under this OMB approval for non-statistical purposes including, but not limited to, publication of both Respondent's identity and its data, submission of the information to agencies outside BTS for review, analysis and possible use in regulatory and other administrative matters.

Issued in Washington, DC, on May 31, 2012.

Director, Bureau of Transportation Statistics, Research and Innovative Technology Administration.

OMB Approval No. 2138-0041

Title: Airline Service Quality Performance -Part 234.

Form No.: BTS Form 234.

Type Of Review: Re-instatement of an expired collection.

Respondents: Large certificated air carriers that account for at least 1 percent of domestic scheduled passenger revenues.

Number of Respondents: 14.

Total Number of Annual Responses: 168.

Estimated Time per Response: 20 hours.

Total Annual Burden: 3,360 hours.

Needs and Uses

Consumer Information

Part 234 gives air travelers information concerning their chances of on-time flights and the rate of mishandled baggage by the 14 largest scheduled domestic passenger carriers.

Reducing and Identifying Traffic Delays

The Federal Aviation Administration uses Part 234 data to pinpoint and analyze air traffic delays. Wheels-up and wheels-down times are used in conjunction with departure and arrival times to show the extent of ground delays. Actual elapsed flight time, wheels-down minus wheels-up time, is compared to scheduled elapsed flight time to identify airborne delays. The

reporting of aircraft tail number allows the FAA to track an aircraft through the air network, which enables the FAA to study the ripple effects of delays at hub airports. The data can be analyzed for airport design changes, new equipment purchases, the planning of new runways or airports based on current and projected airport delays, and traffic levels. The identification of the reason for delays allows the FAA, airport operators, and air carriers to pinpoint delays under their control.

The Confidential Information Protection and Statistical Efficiency Act of 2002 (44 U.S.C. 3501 note), requires a statistical agency to clearly identify information it collects for non-statistical purposes. BTS hereby notifies the respondents and the public that BTS uses the information it collects under this OMB approval for non-statistical purposes including, but not limited to, publication of both Respondent's identity and its data, submission of the information to agencies outside BTS for review, analysis and possible use in regulatory and other administrative matters.
