Advisory Committee on Reactor Safeguards (ACRS) Meeting of the ACRS Subcommittee on Planning and Procedures; Notice of Meeting

The ACRS Subcommittee on Planning and Procedures will hold a meeting on July 10, 2012, Room T-2B1, 11545 Rockville Pike, Rockville, Maryland.

The entire meeting will be open to public attendance, with the exception of a portion that may be closed pursuant to 5 U.S.C. 552b (c)(2) and (6) to discuss organizational and personnel matters that relate solely to the internal personnel rules and practices of the ACRS, and information the release of which would constitute a clearly unwarranted invasion of personal privacy.

The agenda for the subject meeting shall be as follows:

**Tuesday, July 10, 2012—12:00 p.m.
until 1:00 p.m.**

The Subcommittee will discuss proposed ACRS activities and related matters. The Subcommittee will gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the Full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official (DFO), Antonio Dias (Telephone 301-415-6805 or Email: Antonio.Dias@nrc.gov) five days prior to the meeting, if possible, so that arrangements can be made. Thirty-five hard copies of each presentation or handout should be provided to the DFO thirty minutes before the meeting. In addition, one electronic copy of each presentation should be emailed to the DFO one day before the meeting. If an electronic copy cannot be provided within this timeframe, presenters should provide the DFO with a CD containing each presentation at least thirty minutes before the meeting.

Electronic recordings will be permitted only during those portions of the meeting that are open to the public. Detailed procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 17, 2011, (76 FR 64126-64127).

Information regarding changes to the agenda, whether the meeting has been canceled or rescheduled, and the time allotted to present oral statements can be obtained by contacting the identified DFO. Moreover, in view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the DFO if such rescheduling would result in a major inconvenience.

If attending this meeting, please enter through the One White Flint North building, 11555 Rockville Pike, Rockville, MD. After registering with security, please contact Mr. Theron Brown (240-888-9835) to be escorted to the meeting room.

II. Background

On December 4, 2007 (72 FR 68043), NRC published a **Federal Register** Notice regarding changes to Title 10 of the *Code of Federal Regulations* (10 CFR) parts 19, 20 and 50. Specific changes to 10 CFR part 20 included a definition change to the total effective dose equivalent (TEDE), which allowed NRC licensees to use the effective dose equivalent (for external exposures) in place of the deep dose equivalent in determining the TEDE value. Section 20.2206(a) specifies seven categories of licensees that are required to report

occupational radiation dose information to the NRC annually and Section 20.2206(b) allows licensees to submit this information in paper format on NRC Form 5, "Occupational Dose Record for a Monitoring Period," or in an equivalent paper or electronic format. The change to 10 CFR parts 19, 20 and 50 became effective on February 15, 2008. The current NRC Form 5 can be found on NRC's Public Web page, <http://www.nrc.gov/reading-rm/doc-collections/forms/nrc5.pdf>.

III. Discussion

The NRC staff believes that the current NRC Form 5 should be modified to align with the existing TEDE definition in 10 CFR part 20. To ensure that the NRC is well informed of all of the benefits and burdens associated with revising the current NRC Form 5, the NRC is seeking input from stakeholders regarding the proposed draft NRC Form 5. Specifically, the NRC- and Agreement State-licensees who are required to comply with Section 20.2206(b) or compatible State regulations should submit comments regarding (1) the layout of the proposed draft NRC Form 5, (2) estimated economic costs associated with modifying existing information technology (IT) systems to include the new "Effective Dose Equivalent for External Exposures (EDEX)" field, (3) estimated economic savings associated with calculating EDEX for certain occupational employees, and (4) the clarity of the instructions provided for completing the proposed draft NRC Form 5, specifically concerning the use of EDEX and the new directions for blocks 11a and 11b. Stakeholders and interested parties also may provide other options for the current NRC Form 5, issues with the current NRC Form 5, or other information for NRC's consideration associated with the current NRC Form 5. The NRC staff will use this feedback in developing a new NRC Form 5 and a new NRC Form 4, "Cumulative Occupational Dose History."

Dated at Rockville, Maryland, this 12th day of June 2012.

For the Nuclear Regulatory Commission,
Stephanie Bush-Goddard,
Chief, Division of Systems Analysis, Office of Nuclear Regulatory Research.
