II. Brief Summary of the Memorandum of Understanding (MOU)

EPA regulates pesticides in particular plant-incorporated protectants (PIPs). PIPs are pesticidal substances (such as *Bacillus thuringiensis* protein) produced in plants and the genetic material necessary for their production in plants (such as *cry* genes). EPA grants experimental use permits for field testing and registrations that permit the sale and use of pesticides, including

PIPs, in commerce under FIFRA, 7 U.S.C. 136 *et seq.* EPA also issues tolerances or tolerance exemptions that permit pesticide chemical residues in food under section 408 of FFDCA.

The MOU will support and encourage cooperation and communication between USDA, FDA, and EPA in the regulatory oversight over genetically engineered plants and the foods derived from such plants. Under the MOU, USDA/APHIS/BRS, FDA, and EPA agree to share with each other information about genetically engineered plants and the foods derived from such plants, including non-public information exempt from public disclosure usually referred to as "confidential business information" and/or "trade secrets" (also referred to as "non-public information" in the MOU).

Subject to Units A, B, and C defined in the MOU, an agency shall not further disclose non-public information received under the MOU except with the written permission of the agency from which the non-public information originated.

Under the MOU, USDA/APHIS/BRS would share non-public information including CBI that it receives from private entities pursuant to its biotechnology regulations under 7 CFR part 340 only as described below.

Confidential information provided by USDA/APHIS/BRS may only be shared with FDA and EPA personnel who have been granted access to non-public information by the Director of USDA/APHIS/BRS' Regulatory Operations Division or his/her designate via the APHIS Access Authorization Agreement for Trade Secrets and Confidential Business Information form.
