SUPPLEMENTARY INFORMATION:

I. Abstract

The United States and Korea negotiated the US-Korea Free Trade Agreement (the "Agreement") which was implemented into U.S. law pursuant to the United States-Korea Free Trade Agreement Implementation Act ("the Act"). Under the provisions of the Act, textile and apparel goods must contain fibers, yarns, and fabrics produced in Korea or the United States to receive duty-free tariff treatment. The Agreement also provides for the establishment of a list of specific fibers, yarns, and fabrics that are not available in commercial quantities in a timely manner from producers in the United States. Articles containing these commercially unavailable fibers, yarns, and fabrics are also entitled to duty-free or preferential duty treatment despite not being produced in the United States.

The list of commercially unavailable fabrics, yarns, and fibers may be changed pursuant to the commercial availability provision of the Agreement and the Act. Under Section 202(o) of the Act ("the commercial availability provision"), interested entities from Korea or the United States have the right to request that a specific fiber, yarn, or fabric be added to, or removed from, the list of commercially unavailable fibers, yarns, and fabrics. This right becomes effective when the Agreement enters into force.

Section 202(o)(3)(F) of the Act requires that the President establish procedures for parties to follow when exercising the right to make these requests. The President delegated the responsibility for publishing the procedures and administering

commercial availability requests to the Committee for the Implementation of Textile Agreements (CITA), which issues procedures and acts on requests through the Office of Textiles and Apparel ("OTEXA").

The intent of these procedures is to foster the trade in U.S. and Korean textile and apparel articles by allowing non-originating fibers, yarns, and fabrics to be placed on or removed from a list of items not available in commercial quantities, on a timely basis, and in a manner that is consistent with normal business practice. To this end, these procedures are intended to facilitate the transmission, on a timely basis, of requests for commercial availability determinations and offers to supply the products that are the subject of the requests; have the market indicate the availability of the supply of the subject products; make available promptly, to interested entities and parties, information received regarding the requests for products and offers to supply; ensure wide participation by interested entities and parties; provide careful scrutiny of information provided to substantiate order requests and responses of offers to supply; and provide timely public dissemination of information used by CITA in making commercial availability determinations.

For a fiber, yarn or fabric to be added to Appendix 4-B-1, an interested entity must submit to CITA a Request for a Commercial Availability Determination ("Request") which states that the subject product is not commercially available in the United States within a commercially reasonable timeframe (i.e., timely). In support of its claim, the requestor must provide information to CITA regarding its attempts to source the subject product in the United States, and why it determined that the product is not available in a timely manner. Potential suppliers from the United States may submit a Response with an Offer to Supply ("Response"), asserting their capability and capacity to supply the subject product. These Responses must include information supporting the capability and capacity assertion. If the requestor disputes a responder's assertions, the requestor may submit a Rebuttal comment offering its contention, along with supporting information and documentation.

The information collected by CITA from Requests, Responses and Rebuttals will be used to determine whether the subject product is available in commercial quantities in a timely manner in the United States under the commercial availability provision of the Act. Requests, Responses, and Rebuttals must identify confidential information.
