SUPPLEMENTARY INFORMATION:

Title of Collection: 2013 National Survey of College Graduates.

OMB Approval Number: 3145-0141.

Type of Request: Intent to seek approval to reinstate an information collection for three years.

1. *Abstract.* The National Survey of College Graduates (NSCG) has been conducted biennially since the 1970s. The 2013 NSCG sample will be selected from the 2011 American Community Survey (ACS), the 2010 NSCG, and the 2010 National Survey of Recent College Graduates (NSRCG). The purpose of this longitudinal panel survey is to provide national estimates on the science and engineering workforce and changes in their employment, education and demographic characteristics. The NSCG is one of the components of the Scientists and Engineers Statistical Data System (SESTAT), which produces national estimates of the size and characteristics of the nation's science and engineering population. The 2013 NSCG will provide necessary input into the SESTAT.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to “* * * provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government.” The NSCG is designed to comply with these mandates by

providing information on the supply and utilization of the nation's scientists and engineers.

The NSF uses the information from the NSCG to prepare congressionally mandated reports such as *Women, Minorities and Persons with Disabilities in Science and Engineering and Science and Engineering Indicators*. A public release file of collected data, designed to protect respondent confidentiality, will be made available to researchers on the Internet.

The U.S. Census Bureau, as in the past, will conduct the NSCG for NSF. The survey data collection will begin in February 2013 using web and mail questionnaires. Nonrespondents to the web or mail questionnaire will be followed up by computer-assisted telephone interviewing. The survey will be collected in conformance with the Confidential Information Protection and Statistical Efficiency Act of 2002, and the individual's response to the survey is voluntary. NSF will ensure that all information collected will be kept strictly confidential and will be used only for statistical purposes.

2. *Expected Respondents.* A statistical sample of approximately 144,000 persons will be contacted in 2013. NSF estimates the response rate to be 80 to 90 percent.

3. *Estimate of Burden.* The amount of time to complete the questionnaire may vary depending on an individual's circumstances; however, on average it will take approximately 25 minutes. NSF estimates that the total burden for the 2013 NSCG will be no more than 50,542 hours.

Dated: September 17, 2012.

Suzanne H. Plimpton,

*Reports Clearance Officer, National Science
Foundation.*
