

All Other Exporters

With regard to whether imports of subject merchandise by the “all other” exporters of hangers from Vietnam were massive, we preliminarily determine that because there is evidence of the existence of countervailable subsidies that are inconsistent with the Subsidies Agreement, an analysis is warranted as to whether there was a massive increase in shipments by the “all other” companies, in accordance with 19 CFR 351.206(h)(1). Therefore, we analyzed, in accordance with 19 CFR 351.206(i), monthly shipment data for the period August 2011 through May 2012, using shipment data from the ITC’s Dataweb, adjusted to remove the shipments by the respondents participating in the investigation.¹³ For this analysis, we used only the data pertaining to the HTSUS numbers 7326.20.0020 and 7323.99.9080, which are the HTSUS categories under which a majority of the subject merchandise entered the United States. The data provided by the Hamico Companies and the data for shipments by other exporters from the ITC’s Dataweb indicate there was a massive increase in shipments, as defined by 19 CFR 351.206(h). See Critical Circumstances Memorandum at Attachment II.

Conclusion

We preliminarily determine that critical circumstances do not exist for imports of steel wire garment hangers from Hamico Companies. Although the *Preliminary Determination* indicates that the Hamico Companies benefited from programs that are inconsistent with the Subsidies Agreement, the Hamico Companies’ shipment data do not indicate a massive increase in shipments of subject merchandise to the United States. With regard to the Infinite Companies, as AFA, we preliminarily determine that the companies benefited from programs that are inconsistent with the Subsidies Agreement and that there was a massive increase in the companies’ shipments of subject merchandise to the United States. Therefore, we preliminarily determine that critical circumstances do not exist with regard to shipments from one mandatory respondent, the Hamico Companies and, as AFA, preliminarily

determine that critical circumstances exist with regard to shipments from the other mandatory respondent, the Infinite Companies.

We also preliminarily determine, based on our analysis of the shipment data provided by the Hamico Companies and the ITC Dataweb data, that critical circumstances exist for imports from “all other” exporters of steel wire garment hangers from Vietnam. The Department conducted its analysis of the shipment data for all other exporters of steel wire garment hangers by subtracting the total quantity and value of the Hamico Companies’ reported quantity and value during the POI from the total quantity and value of all imports of steel wire garment hangers from Vietnam. The results of this analysis indicate that the imports attributed to all other imports exceeded the fifteen percent threshold. See *Critical Circumstances Memorandum* at Attachment 1. We will make a final determination concerning critical circumstances for steel wire garment hangers from Vietnam when we make our final countervailable subsidy determination in this investigation.

Suspension of Liquidation

In accordance with section 703(e)(2)(A) of the Act, we are directing U.S. Customs and Border Protection to suspend liquidation, with regard all exporters except the Hamico Companies, of any unliquidated entries of subject merchandise from the Vietnam entered, or withdrawn from warehouse for consumption, on or after March 6, 2012, which is 90 days prior to the date of publication of the *Preliminary Determination* in the *Federal Register*.

ITC Notification

In accordance with section 703(f) of the Act, we will notify the ITC of our determination.

This determination is issued and published pursuant to sections 703(f) and 777(i)(1) of the Act.

Dated: December 4, 2012.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new information collection to benefit local fishery managers in the U.S. Virgin Islands (USVI). Non-commercial fishing is an important activity on St. Croix, USVI yet robust data characterizing the catch, effort and cultural attributes of such fishing are limited. Without these basic data on the non-commercial fishery on St. Croix, it is not possible to develop required fishery management plans. Consequently, local fishery managers have asked for collection of information required to make management decisions, information that will help them to balance the need for more effective fishery management with social, economic and cultural imperatives of the region.

Researchers propose to conduct two distinct data collection efforts, Collection A and Collection B. Collection A will consist of a survey of non-commercial, shore-based fishers. This survey will ascertain the catch,

effort, and socioeconomic characteristics of fishers using this mode of fishing on St. Croix. Collection B will be a survey of boat-based, non-commercial fishers on St. Croix to document levels of catch and effort for this mode of fishing.

The data gathered will be used to describe recreational and subsistence sectors in St. Croix, and evaluate the socio-economic impacts of federal regulatory actions.

In addition, the information will be used to strengthen and improve fishery management decision-making, satisfy legal mandates under Executive Order 12866, the Magnuson Stevens Fishery Conservation and Management Act (U.S.C. 1801 *et seq.*), the Regulatory Flexibility Act, the Endangered Species Act, and the National Environmental Policy Act, and other pertinent statutes.

II. Method of Collection

Collection A, which will take place over a 12-month period, will be comprised of two data collection activities: (1) A survey of shore-based fishers, and (2) counts of shore-based fishers. Collection B, which will take place over a 24-month period, will include two data collection activities: (1) A survey of fishers at boat ramps and, (2) a count of boat trailers or vehicles at launch sites where surveys are administered.
