[NPS-WASO-NAGPRA-11728; 2200-1100-665]

Notice of Inventory Completion: U.S. Department of Defense, Army, Fort Sill Museum, Fort Sill, OK, and Museum of the Great Plains, Lawton, OK

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Defense, Army, Fort Sill Museum, and the Museum of the Great Plains have completed an inventory of human remains, in consultation with the appropriate Indian tribes, and have determined that there is no cultural affiliation between the remains and any present-day Indian tribe. Representative of any Indian tribe that believes itself to be culturally affiliated with the human remains may contact the Fort Sill Museum. Disposition of the human remains to the Indian tribes stated below may occur if no additional requestors come forward.

DATES: Representatives of any Indian tribe that believes it has a cultural affiliation with the human remains should contact the Fort Sill Museum at the address below by January 17, 2013.

ADDRESSES: Scott A. Neel, Ph.D., Director, Fort Sill National Historic Landmark and Museum, U.S. Army Fires Center of Excellence, Fort Sill, OK 73503, telephone (580) 442-6570.

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the Fort Sill Museum and in the possession of the Museum of the Great Plains. The human remains were removed from Fort Sill, Comanche County, OK.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the Fort Sill Museum and the Museum of the Great Plains professional staffs in consultation

with representatives the Apache Tribe of Oklahoma; Caddo Nation of Oklahoma; Cheyenne and Arapaho Tribes, Oklahoma (previously listed as the Cheyenne-Arapaho Tribes of Oklahoma); Chickasaw Nation; Comanche Nation, Oklahoma; Delaware Nation, Oklahoma; Fort Sill Apache Tribe of Oklahoma; Kiowa Indian Tribe of Oklahoma; and the Wichita and Affiliated Tribes (Wichita, Keechi, Waco & Tawakonie), Oklahoma.

History and Description of the Remains

In March 1977, human remains representing, at minimum, two individuals were removed from site 34CM323 in Comanche County, OK. Staff of the Museum of the Great Plains found the human remains during a reconnaissance survey on Federal property in Fort Sill. The burials were exposed by natural elements on the bank of Crater Creek, were excavated by staff of the Museum of the Great Plains, and were sent to the Osteology Laboratory of the Institute of Applied Sciences at North Texas State University. The burials remained at North Texas State University until January 27, 2012, when, at the request of the Fort Sill Museum, they were returned to the Museum of the Great Plains. The Museum of the Great Plains physically inventoried the remains for NAGPRA purposes and stabilized the remains according to 36 CFR 79 standards. No known individuals were identified. No associated funerary objects are present.

Barbara H. Butler, Ph.D., of North Texas State University, analyzed the remains in 1977, and concluded that the remains from this site represented two individuals. Human remains from Burial 2, with only a few small occipital pieces, represented one adult. Human remains from Burial 1 consisted of fragmentary remains of a nine-year-old child, based upon dental analysis. The dental remains from Burial 1 were moderately shovel-shaped, and Butler concluded the remains were probably Native American. The human remains were shallowly buried in alluvium deposits, and no pit profile could be detected during excavations. The body positions suggested that the burials were placed in a pit excavated into the alluvium deposits, and are therefore younger than those deposits. A 1978 geologic inspection of the site estimates the age of the alluvium deposits as "late Holocene to early historic." The lack of soil development, as well as the preservation of bones in acidic soils, suggest but do not confirm a late prehistoric to historic age for the burials.

Prehistorically and historically, Native Americans have inhabited the area near Fort Sill in southwest Oklahoma, based on evidence of archaeology, geology, and historical accounts. The people of the Wichita, Comanche, Kiowa, Apache, Cheyenne, and Arapaho tribes are well documented in the area, and their presence was the reason Fort Sill was established.

Determinations Made by the U.S. Department of Defense, Army, Fort Sill Museum and the Museum of the Great Plains

Officials of the Fort Sill Museum and the Museum of the Great Plains have determined that:

- Based on physical characteristics of the dental analysis, the human remains are Native American.

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of two individuals of Native American ancestry.

- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian tribe.

- Multiple lines of evidence, including treaties, Acts of Congress, and Executive Orders, indicate that the Apache Tribe of Oklahoma; Cheyenne and Arapaho Tribes, Oklahoma (previously listed as the Cheyenne-Arapaho Tribes of Oklahoma); Chickasaw Nation; Comanche Nation, Oklahoma; Kiowa Indian Tribe of Oklahoma; and the Wichita and Affiliated Tribes (Wichita, Keechi, Waco & Tawakonie), Oklahoma, are aboriginal to the area from which the human remains were removed.

- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains may be to the Apache Tribe of Oklahoma; Cheyenne and Arapaho Tribes, Oklahoma (previously listed as the Cheyenne-Arapaho Tribes of Oklahoma); Chickasaw Nation; Comanche Nation, Oklahoma; Kiowa Indian Tribe of Oklahoma; and the Wichita and Affiliated Tribes (Wichita, Keechi, Waco & Tawakonie), Oklahoma.

Additional Requestors and Disposition

Representatives of any Indian tribe that believes itself to be culturally affiliated with the human remains or any other Indian tribe that believes it satisfies the criteria in 43 CFR 10.11(c)(1) should contact Scott A. Neel, Ph.D., Director, Fort Sill National Historic Landmark and Museum, U.S. Army Fires Center of Excellence, Fort Sill, OK 73503, telephone (580) 442-

6570. Disposition of the human remains to the Apache Tribe of Oklahoma; Cheyenne and Arapaho Tribes, Oklahoma (previously listed as the Cheyenne-Arapaho Tribes of Oklahoma); Chickasaw Nation; Comanche Nation, Oklahoma; Kiowa Indian Tribe of Oklahoma; and the Wichita and Affiliated Tribes (Wichita, Keechi, Waco & Tawakonie), Oklahoma, may proceed after that date if no additional requestors come forward.

The Fort Sill Museum is responsible for notifying the Apache Tribe of Oklahoma; Caddo Nation of Oklahoma; Cheyenne and Arapaho Tribes, Oklahoma (previously listed as the Cheyenne-Arapaho Tribes of Oklahoma); Chickasaw Nation; Comanche Nation, Oklahoma; Delaware Nation, Oklahoma; Fort Sill Apache Tribe of Oklahoma; Kiowa Indian Tribe of Oklahoma; and the Wichita and Affiliated Tribes (Wichita, Keechi, Waco & Tawakonie), Oklahoma, that this notice has been published.

Dated: November 13, 2012.

David Tarler,

Acting Manager, National NAGPRA Program.

National Park Service

[NPS-WASO-NAGPRA-11730; 2200-1100-665]

Notice of Inventory Completion: The Museum of Anthropology at Washington State University, Pullman, WA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The Museum of Anthropology has completed an inventory of human remains and associated funerary objects, in consultation with the appropriate Indian tribe, and has determined that there is a cultural affiliation between the human remains and associated funerary objects and the Confederated Tribes of the Colville Reservation.

Representatives of any Indian tribe that believes itself to be culturally affiliated with the human remains and associated funerary objects may contact the Museum of Anthropology at Washington State University. Repatriation of the human remains associated funerary items to the tribes stated below may occur if no additional claimants come forward.

DATES: Representatives of any Indian tribe that believes it has a cultural

affiliation with the human remains and associated funerary objects should contact the Museum of Anthropology at Washington State University at the address below by January 17, 2013.

ADDRESSES: Mary Collins, Museum of Anthropology at Washington State University, Pullman, WA 99164-4910, telephone (509) 335-4314.

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects in the possession of the Museum of Anthropology at Washington State University, Pullman, WA. The human remains and associated funerary objects were removed from Stevens County, WA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the Museum of Anthropology at Washington State University professional staff in consultation with representatives of the Confederated Tribes of the Colville Reservation.

History and Description of the Remains

In 1979, human remains representing, at minimum, four individuals were removed from site 45CH235, the "Olds Station Site" located in Stevens County, WA. The remains were disturbed by the excavation of a water line for the city of Wenatchee. The remains came from a single excavator bucket load of sediment. The remains were thought to have come from very near the ground surface and were thought to be less than 100 years old and possibly to represent a single mass interment. The 11 associated funerary objects include one hammerstone, two edge ground cobbles, one net sinker, one stone core, one wooden coffin fragment, one biface, three flakes, and one maul.

The remains were identified by archaeologists from Washington State University who were monitoring the water line excavation work (Galm 1980). At some unknown time after 1980, the remains were transferred to the University of Idaho. In 2000, the

remains were returned to the Museum of Anthropology at Washington State University.

The site is within the traditional territory of Wenatchee Band of the Confederated Tribes of the Colville Reservation. Historical, archaeological, ethnographic, and linguistic information links this group of people to the area, represented by the present-day Confederated Tribes of the Colville Reservation. Archaeological evidence recorded at the site suggests the burials may be as recent as the late 19th century.

Determinations Made by the Museum of Anthropology at Washington State University

Officials of the Museum of Anthropology at Washington State University have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of four individuals of Native American ancestry.

- Pursuant to 25 U.S.C. 3001(3)(A), the 11 objects described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.

- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and the Confederated Tribes of the Colville Reservation.

Additional Requestors and Disposition

Representatives of any Indian tribe that believes itself to be culturally affiliated with the human remains and associated funerary objects should contact Mary Collins, Museum of Anthropology at Washington State University Pullman, WA 99164-4910, telephone (509) 335-4314, before January 17, 2013. Repatriation of the human remains and associated funerary objects to the Confederated Tribes of the Colville Reservation may proceed after that date if no additional claimants come forward.

The Museum of Anthropology at Washington State University is responsible for notifying the Confederated Tribes of the Colville Reservation that this notice has been published.

Dated: November 13, 2012.
