SUPPLEMENTARY INFORMATION:

Summary of Information Collection

The Biennial Review employs a survey to assess organizational-customer satisfaction with the associated business line and addresses overall responsiveness to customer requirements, satisfaction with specific products and services, and quality of coordination with organizational customers. The survey identifies distinct areas of business (business lines) for all Defense Agencies and DoD Field Activities participating in the Review, creates lists of organizational customers specific to each business line, and uses a set of standard evaluation questions across all business lines. Respondents covered by this announcement are private-sector customers of these business lines, such as for the Federal Voting Assistance Program and Defense Finance and Accounting Service.

SUPPLEMENTARY INFORMATION:

Summary of Information Collection

Executive Order (EO) 12829, "National Industrial Security Program (NISP)," stipulates that the Secretary of Defense shall serve as the Executive Agent for inspecting and monitoring the contractors, licensees, and grantees who require or will require access to classified information; and for determining the eligibility for access to classified information of contractors, licensees, and grantees and their respective employees. E.O. 12829 also authorizes the Executive Agent to issue, after consultation with affected agencies, standard forms that will promote the implementation of the NISP.

The Under Secretary of Defense for Intelligence assigned DSS to exercise authority and responsibility for central operational management of DoD PSI workload projections, and monitoring of PSI funding and investigation quality issues for DoD components to include cleared contractors under the National Industrial Security Program. In the past, DSS has relied on historical data for agency budget projections regarding the numbers of PSIs required by cleared contractor entities; however, historical data did not provide a particularly accurate or credible estimate of such workload. In this annual collection of information, DSS asks the Facility Security Officers of cleared contractor entities to provide projections of the numbers and types of personnel security investigations required as well as providing a description of the methodology used for the projections, and the percentage of the cleared contractor's projections representing DoD and non-DoD (NISP) agencies PSI requirements for cleared contractors. The data will be incorporated into DSS' budget submissions and to track against actual cleared contractor's actual PSI submissions.

The Office of Personnel Management (OPM) has responsibility to conduct PSIs and the subsequent periodic reinvestigations (PRs) in accordance with the Code of Federal Regulations, Title 5, Part 736.

Representative of various industry associations, the National Industrial Security Program Policy Advisory Committee (NISPPAC), the Military Services, various elements of the Department of Defense and other Federal Government Agencies are familiar with the annual survey.
