DEPARTMENT OF DEFENSE

Department of the Army: Corps of Engineers

Public Scoping Meetings and Preparation of Environmental Impact Statement for the Proposed Glades Reservoir

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of Intent to Prepare an Environmental Impact Statement.

SUMMARY: The U.S. Army Corps of Engineers (USACE), Savannah District, has received an application (File Number SAS–2007–00388) for a Department of the Army Permit pursuant to Section 404 of the Clean Water Act (33 U.S.C. 1344) from the Hall County Board of Commissioners (Applicant) for a proposed water supply reservoir project to be located in Hall County, Georgia. The proposed project would be comprised of a new pump-storage water supply reservoir (Glades Reservoir), as well as pipelines and pumping stations to withdraw water from the Chattahoochee River and to connect with the existing Cedar Creek Reservoir. Water would be pumped to the existing Cedar Creek Reservoir located in eastern Hall County for treatment and distribution to Hall County customers. The Applicant believes this action is needed to supply water for Hall County through the year 2060.

The primary federal involvement associated with the proposed action is the discharge of dredged or fill material into waters of the United States, including jurisdictional wetlands. It is estimated, by the Applicant, that 39.2 acres of jurisdictional wetlands and approximately 95,000 linear feet of streams would be adversely affected by the proposed action. Federal

authorizations for the proposed project would constitute a “major federal action.” Based on the potential impacts, both individually and cumulatively, the USACE intends to prepare an Environmental Impact Statement (EIS) in compliance with the National Environmental Policy Act to render a final decision on the permit application.

The USACE’s decision will be to either issue, issue with modification or deny a Department of the Army permit for the proposed action. The EIS will assess the potential social, economic and environmental impacts of the construction and operation of the reservoir, raw water conveyances, associated facilities, and appurtenances. The EIS is intended to be sufficient in scope to address federal, state and local requirements, environmental issues concerning the proposed action, and permit reviews.

DATES: The scoping period will commence with the publication of this notice. The formal scoping period will end 60 days after the publication of this notice. Comments regarding issues relative to the proposed project should be received by April 17, 2012.

ADDRESSES: You may submit written comments by mail to U.S. Army Corps of Engineers, Attention: Regulatory Division, 100 West Oglethorpe Avenue, Savannah, Georgia 31401–3640. You may also submit written comments online at <http://www.gladesreservoir.com>. Documents pertinent to the proposed project may be examined at the Web site <http://www.gladesreservoir.com>.

FOR FURTHER INFORMATION CONTACT: Richard Morgan, Project Manager, U.S. Army Corps of Engineers, at (912) 652–5139.

SUPPLEMENTARY INFORMATION: The USACE Savannah District intends to prepare an EIS on the proposed Glades Reservoir project. The Hall County Board of Commissioners proposes this project and is the applicant for a Department of the Army permit (File Number SAS–2007–00388).

1. Project Description: The Glades Reservoir is a proposed pumped-storage reservoir on Flat Creek, a tributary to the Chattahoochee River upstream of Lake Sidney Lanier. The drainage area for the proposed Glades Reservoir is estimated to be 17.6 square miles. The proposed dam would impound an approximately 850-acre reservoir at a normal pool elevation of 1180 feet mean sea level (msl) and provide 11.7 billion gallons of water storage capacity. The proposed Glades Reservoir would be located approximately 12 miles northeast of Gainesville, Georgia, northeast of US 23/
