three years. The project stopped operating prior to an August 2006 safety inspection.

The most recent correspondence received from this licensee, was a Joint Offer of Settlement, dated July 22, 2005. The correspondence stated that the licensee had disconnected all electrical generating equipment from the power grid and made reasonable efforts to secure the site. The Commission did not act on the filing due to the inability to resolve issues associated with terminating the license. Since then, Commission staff inspected the project in August 2006 and again in September 2009. A project representative was not present during the inspections, and the project was locked and appeared abandoned.
