DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of Start-Up Option Exclusive License: The Development of Liposomal Therapeutic Agents for the Treatment of Human Epithelial Cancers and Liposarcomas

AGENCY: National Institutes of Health, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: This is notice, in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i), that the National Institutes of Health, Department of Health and Human Services, is contemplating the grant to ZoneOne Pharma, Inc., of an exclusive evaluation option license to practice the inventions embodied in the following US Patent (and all foreign counterparts): Serial No. 6,890,917 entitled, "Geldanamycin Derivative and Method of Treating Cancer Using Same" [HHS Ref. E-050-2000/0-US-15]. The patent rights in this invention have been assigned to the Government of the United States of America.

The prospective exclusive evaluation option license territory may be worldwide, and the field of use may be limited to:

The pharmaceutical use in humans of 17-dimethylaminoethylamino-17-

demethoxygeldanamycin ("17-DMAG") as a liposome-encapsulated drug, alone or in combination with other agents, for the treatment of the following types of cancer: ovary, pancreas, metastatic skin, head and neck, colon, kidney, non-small cell lung, or liposarcoma.

Upon the expiration or termination of the exclusive evaluation option license, ZoneOne Pharma, Inc., will have the exclusive right to execute an exclusive commercialization license which will supersede and replace the exclusive evaluation option license with no greater field of use and territory than granted in the exclusive evaluation option license.

DATES: Only written comments or applications for a license (or both) which are received by the NIH Office of Technology Transfer on or before April 2, 2013 will be considered.

ADDRESSES: Requests for copies of the patent application, inquiries, comments, and other materials relating to the contemplated exclusive evaluation option license should be directed to: Patrick McCue, Ph.D., Licensing and Patenting Manager, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852-3804; Telephone: (301) 435-5560; Facsimile: (301) 402-0220; Email: mccuepat@mail.nih.gov.

SUPPLEMENTARY INFORMATION: This invention concerns 17-DMAG, the first water-soluble analog of 17-AAG, a less toxic and more stable analog of the antitumor antibiotic geldanamycin.

The prospective exclusive evaluation license is being considered under the small business initiative launched on 1 October 2011, and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive evaluation license, and a subsequent exclusive commercialization license, may be granted unless the NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7 within fifteen (15) days from the date of this published notice.

Complete applications for a license in the field of use filed in response to this notice will be treated as objections to the grant of the contemplated exclusive evaluation option license. Comments and objections submitted to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: March 8, 2013.

2. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and

FOR FURTHER INFORMATION CONTACT: CFATS Program Manager, DHS/NPPD/IP/ISCD, CFATS@hq.dhs.gov.

SUPPLEMENTARY INFORMATION: Section 550 of the Homeland Security Appropriations Act of 2007, Public Law 109–295, provides DHS with the authority to regulate the security of high-risk chemical facilities. On April 9, 2007, the Department issued an Interim Final Rule (IFR), implementing this statutory mandate at 72 FR 17688. Section 550 of the Homeland Security Appropriations Act of 2007 requires a risk-based approach to security.

CFATS is the Department’s regulations under Section 550 governing security at high-risk chemical facilities. See 6 CFR part 27. CFATS represents a national-level effort to minimize terrorism risk to such facilities. Its design and implementation balance maintaining economic vitality with security facilities and their surrounding communities. In collaboration with the private sector and other stakeholders, the Department designed the regulations to take advantage of protective measures already in place and to allow facilities to employ a wide range of tailored measures to satisfy the regulations’ Risk-Based Performance Standards (RBPS). The instruments within this collection will be used to manage the CFATS program.

Response to Comment Submitted During 60-Day Comment Period: The Department received a comment suggesting that in the 60-day notice, the Department incorrectly calculated the burden estimates associated with the instrument “Request for a Technical Correction.” The commenter assumed that the number of responses per respondent for this instrument was one. In fact, the Department estimated in the current Information Collection, which expires on March 31, 2013, that each respondent will on average respond 1.5 times. This assumption was carried over into the burden estimates used by the Department in the 60-day notice but not made explicit. The total annual burden for this instrument is calculated as follows [0.25 hours x 185 respondents x 1.5 responses per respondent], which equals 69.37 hours. The Department did not revise the burden estimates for this instrument.

Therefore, for this instrument and the other instruments in this 30-day notice the Department will continue to rely on the analysis and resulting burden estimates in the 60-day notice.
