

State	Permit No.	Area covered by the general permit
Utah	UTG651000	Indian country within the State of Utah except for the Goshute Indian Reservation, Navajo Indian Reservation, and Ute Mountain Indian Reservation (which is covered under permit COG651000).
Wyoming	WYG650000 WYG651000	State of Wyoming except for Indian country. Indian country within the State of Wyoming.

On February 19, 1993 (58 FR 9248), the EPA promulgated “Standards for the Use or Disposal of Sewage Sludge” (40 CFR part 503) and made revisions to the NPDES regulations to include the permitting of facilities/operations that generate, treat, and/or use/dispose of sewage sludge. The States of South Dakota and Utah currently are the only States in Region 8 that have been authorized to administer the biosolids (sludge) program. In 2007 EPA reissued general permits for facilities or operations that generate, treat, and/or use/dispose of sewage sludge by means of land application, landfill, and surface disposal in the States of CO, MT, ND, and WY and in Indian country in the States of CO, MT, ND, SD, WY and UT (except for the Goshute Indian Reservation and the Navajo Indian Reservation). Those general permits expired on October 19, 2012, but were administratively extended. Proposed reissuance of the general permits was published in the **Federal Register** on January 4, 2013 (78 FR 727). The public comment period closed on February 19, 2013. Only one comment was received in response to the public notice, a letter from the South Dakota Department of Agriculture. That letter stated “In response, we offer no comments regarding the notice.” Accordingly, the permits are being reissued without any change from the public notice draft.

The renewal permits are very similar to the previous permits. The administrative burden for most of the regulated sources is expected to be less under the general permits than with individual permits, and it will be much quicker to obtain permit coverage with general permits than with individual permits. Facilities or operations that incinerate sewage sludge are not eligible for coverage under these general permits and must apply for an individual permit. The deadlines for applying for coverage under the general permits are given in the permits and the Fact Sheet. Facilities/operations that had coverage under the previous general permit and have submitted a timely request for coverage under this renewal permit are covered automatically under the permits unless the permit issuing authority requires the submittal of a new notice of intent (NOI).

Other Legal Requirements

Section 401(a)(1) Certification: Since these permits do not involve discharges to waters of the United States, certification under § 401(a)(1) of the Clean Water Act is not necessary for the issuance of these permits and certification will not be requested.

Economic Impact (Executive Order 12866): The EPA has determined that the issuance of this general permit is not a “significant regulatory action” under the terms of Executive Order 12866 (58 FR 51735 (October 4, 1993)) and is therefore not subject to formal OMB review prior to proposal.

Paperwork Reduction Act: The EPA has reviewed the requirements imposed on regulated facilities in these proposed general permits under the Paperwork Reduction Act of 1980, 44 U.S.C.-501 *et seq.* The information collection requirements of these permits have already been approved by the Office of Management and Budget in submissions made for the NPDES permit program under the provisions of the Clean Water Act.

Regulatory Flexibility Act (RFA), 5 U.S.C 601 *et seq.*, as amended by the Small Business regulatory Enforcement Fairness Act (SBREFA): The RFA requires that the EPA prepare a regulatory flexibility analysis for rules subject to the requirements of 5 U.S.C. 553(b) that have a significant impact on a substantial number of small entities. The permit proposed today, however, is not a “rule” subject to the requirements of 5 U.S.C. 553(b) and is therefore not subject to the RFA.

Unfunded Mandates Reform Act: Section 201 of the Unfunded Mandates Reform Act (UMRA), Public Law 104–4, generally requires Federal agencies to assess the effects of their “regulatory actions” defined to be the same as “rules” subject to the RFA) on tribal, state, local governments and the private sector. The permit proposed today, however, is not a “rule” subject to the RFA and is therefore not subject to the requirements of the UMRA.

Authority: Clean Water Act, 33 U.S.C. 1251 *et seq.*

Dated: April 2, 2013.
